

An aerial photograph of a powerful hurricane over the Gulf of Mexico. The storm's eye is a bright, circular center surrounded by dense, swirling white and grey clouds. The surrounding ocean is a deep, dark blue. On the right side of the image, the green and brown landmasses of the Gulf Coast are visible, partially obscured by the storm's outer bands.

governmental organizations and members of the global emergency management community need to have insight into best practices and lessons learned from various disasters across national and cultural boundaries. The evidence obtained from the numerous case studies in this volume serves to build a worldwide community that is better informed about the cultural and traditional contexts of such disasters and better enabled to prepare for, respond to, and finally rebuild sustainable communities after disasters in different environments. The main themes of the case studies include the need for community planning and emergency management to unite in order to achieve the mutual aim of creating a sustainable disaster resilient community coupled with the necessity to enact and implement appropriate laws, policies, and development regulations for disaster risk reduction; the need to develop a clear set of urban planning and urban design principles for improving the built environment's capacities for disaster risk management through the integration of disaster risk reduction education into the curricula of colleges and universities; the need to engage the whole community to build inclusive governance structures as prerequisites for addressing climate change vulnerability and fostering resilience and sustainability. Furthermore, the case studies explore the need to link the existence and value of scientific knowledge accumulated in various countries with decision making in disaster risk management and the relevance and transferability from one cultural context to another of the lessons learned in building institutional frameworks for whole community partnerships.

Critical Issues in Homeland Security James D. Ramsay, Linda A. Kiltz, 2018-04-27. *Critical Issues in Homeland Security: A Casebook* encourages analytical and careful examination of practical homeland security problems through the presentation of contemporary cases involving major state or national events. Case studies demonstrate the complexity of challenges within the domain of homeland security policy and administration. Editors James D. Ramsay and Linda Kiltz carefully curated fourteen cases all from top scholars and practitioners to cover a broad range of legal policy and operational challenges within the field of homeland security. Timely and interesting cases on such issues as arctic security, the use of drones in targeted killings, cyber security, and the emergency management lessons of the 2010 Haiti earthquake give students a deeper understanding of the relationship between the theories and the practices of homeland security. Discussion questions at the end of each case and an online instructor's manual make *Critical Issues in Homeland Security* an even more effective learning tool for any homeland security program.
