Part I Overview and Introduction provides an introduction to core syntactic concepts and representations Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions Part III Grammatical modules and interfaces provides an overview of LFG work on semantics argument structure prosody information structure and morphology Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics learnability psycholinguistics and second language learning Part V Formal and computational issues and applications provides an overview of computational and formal properties of the theory implementations and computational work on parsing translation grammar induction and treebanks Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families The final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches

Picone, Catherine Evans Davies, 2015-03-15 An outgrowth of the Language Variety in the South III symposium *New Perspectives on Language Variety in the South* Historical and Contemporary Approaches comprises forty five original essays on a range of topics regarding the languages and dialects of the American South Book jacket **Deconstructing Constructions** Christopher S. Butler, Javier Martín Arista, 2009-01-14

This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a construction is and what roles constructions play in the frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to the ongoing debate about the relationship between functionalist and constructionist models *Linking Constructions into Functional Linguistics* Brian Nolan, Elke Diedrichsen, 2013-12-06 There is a growing awareness of the significance of constructions in grammar in the world's languages To date there has not been a single volume that addresses the issues of constructions within a functional Role and Reference Grammar RRG account The book is a collection of articles that will serve the scholarly community as a reference work on the role place and significance of constructions within this functional model of grammar As a result this volume represents the first instance of cross linguistic comparison of these important discourse and syntax related phenomena The articles cover a variety of typologically different languages including German Irish Spanish French Japanese Yaqui Tepehua Totonacan Persian and English and they offer new data on the role of constructions within the RRG theory in these languages Further this volume contributes towards providing a comprehensive overview of grammatical constructions which are central to our understanding of how human languages function in a functional linguistics perspective This scholarly work is grounded in a functionally oriented model that makes strong claims of descriptive and typological adequacy The book will represent a valuable step forward in linguistics research as it applies the RRG theoretical framework to the analyses of constructions Language Typology and Historical Contingency Balthasar Bickel, Lenore A. Grenoble, David A. Peterson, Alan Timberlake, 2013-12-15 What is the range of diversity in linguistic types what are the geographical distributions for the attested types and what explanations based on shared history or universals can account for these

distributions This collection of articles by prominent scholars in typology seeks to address these issues from a wide range of theoretical perspectives utilizing cutting edge typological methodology The phenomena considered range from the phonological to the morphosyntactic the areal coverage ranges in scale from micro areal to worldwide and the types of historical contingency range from contact based to genealogical in nature Together the papers argue strongly for a view in which although they use distinct methodologies linguistic typology and historical linguistics are one and the same enterprise directed at discovering how languages came to be the way they are and how linguistic types came to be distributed geographically as they are *Investigations of the Syntax-semantics-pragmatics Interface* Robert D. Van Valin, 2008

Investigations of the Syntax Semantics Pragmatics Interface presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis **Causation, Permission, and**
