
Chapter 01 - New World Beginnings 33,000 B.C. - A.D. 1783

I. Introduction

- Receded human history is only one small portion of earth history
- European explorers “stumbled” on the Americas, altering the course of history in Europe, the Americas, Asia, and Africa

II. The Shaping of North America

- Geologic forces and climate change created the distinctive No. American continent

III. Peopling the Americas

- Ancient Americans probably crossed the Bering “land bridge” from Asia between 35,000 and 10,000 years ago (25,000 year window). Receding ice and rising oceans eliminated the bridge.
- These peoples slowly migrated and inhabited both continents, perhaps numbering up to 54 mill. by 1492 A.D. (4 mill. in No Amer)

IV. The Earliest Americans

- Corn/maize was the central agricultural crop that sustained many of the Indian cultures, moving them from nomadic hunters toward settled agricultural societies
- Complex maize culture spread slowly from Mexico north and east into No. Amer, reaching the southeast as late as 1000 A.D. – Creeks, Choctaws, Cherokees – three-sister farming: corn, beans, squash
- Inquis developed their confederacy as late as the 1500s
- Most American societies were small & migratory – women farmed, men hunted – women often held political and cultural authority
- Though Americans did not dominate the land, they still manipulated it to meet their agricultural needs

V. Indirect Discoverers of the New World—

- Despite early settlements in NE NoAmer @ 1000AD, Norse explorers lacked the social organization to maintain them
- European expansion and connections with Africa and Asia were the catalysts for “discovering America”
- Crusades familiarized Europe with exotic and desirable goods that they were now willing to take risks to trade for
