Service-Wohnen für Senioren Claudia Kempf, 2014-12-02 Claudia Kempf untersucht das Service Wohnen für Senioren auch gelufig unter dem Begriff betreutes Wohnen unter dem Gesichtspunkt des Dienstleistungsmanagements. Ein Fokus wird in diesem Kontext auf die Variablen Dienstleistungsqualität Customer Voluntary Performance als eine freiwillig durch den Kunden erbrachte Leistung sowie Preisfairness gelegt. Die empirische Untersuchung wird mit zwei Probandengruppen durchgeführt: den Bewohnern und Interessenten, welche noch nicht in einem betreuten Wohnen leben. Anhand der Conjoint Analyse werden die Leistungsangebote von betreuten Wohnanlagen untersucht, um so die relativen Wichtigkeiten der Eigenschaftsausprägungen zu ermitteln. In einem Kausalmodell werden auch die Variablen Customer Voluntary Performance und Preisfairness untersucht, um die Wirkbeziehungen untereinander und mit anderen Variablen wie Social Emotional Support und Instrumental Support abzubilden.

Serious Games and Edutainment Applications Minhua Ma, Andreas Oikonomou, Lakhmi C. Jain, 2011-12-10 The recent re-emergence of serious games as a branch of video games and as a promising frontier of education has introduced the concept of games designed for a serious purpose other than pure entertainment. To date, the major applications of serious games include education and training, engineering, medicine, and healthcare, military applications, city planning, production, crisis response, to name just a few. If utilised alongside or combined with conventional training and educational approaches, serious games could provide a more powerful means of knowledge transfer in almost every application domain. Serious Games and Edutainment Applications offers an insightful introduction to the development and applications of games technologies in educational settings. It includes cutting edge academic research and industry updates that will inform readers of current and future advances in the area. The book is suitable for both researchers and educators who are interested in using games for educational purposes as well as game professionals requiring a thorough understanding of issues involved in the application of video games technology into educational settings. It is also applicable to programmers, game artists, and management contemplating or involved in the development of serious games for educational or training purposes.
