Nice Book Future War Christopher Coker:

Future War Christopher Coker, 2015-11-12 Will tomorrow's wars be dominated by autonomous drones and robots and warriors wired into a cybernetic network which can read their thoughts? Will war be fought with greater or lesser humanity? Will it be played out in cyberspace and further afield in Low Earth Orbit? Or will it be fought more intensely still in the sprawling cities of the developing world, the grim black holes of social exclusion on our increasingly unequal planet? Will the Great Powers reinvent conflict between themselves, or is war destined to become much smaller both in terms of its actors and the beliefs for which they will be willing to kill? In this illuminating new book Christopher Coker takes us on an incredible journey into the future of warfare. Focusing on contemporary trends that are changing the nature and dynamics of armed conflict, he shows how conflict will continue to evolve in ways that are unlikely to render our century any less bloody than the last. With insights from philosophy, cutting-edge scientific research, and popular culture, *Future War* is a compelling and thought-provoking meditation on the shape of war to come.

The Future of War Christopher Coker, 2008-04-30 In this book Professor Christopher Coker presents an original and controversial thesis about the future of war. Argues that the biotechnology revolution has given war a new lease of life. Draws on thinkers from Hegel and Nietzsche to the postmodernists. Refers to modern fiction and films. Part of the prestigious Blackwell Manifestos series.

Theorising Future Conflict Mark Lacy, 2023-12-15 This book explores the changing tactics, technologies, and terrains of twenty-first century war. It argues that the world in 2049 is unlikely to look like the climate change artificial intelligence (AI) dystopia depicted in *Blade Runner 2049*, but nor will it be a world where conflict and war have been transformed by a civilising process that eradicates violence and conflict from the human condition. 2049 is also the year that the US Department of Defense has suggested China will become a world-shaping military power. All states will be engaged in arms races across a variety of new tools and technologies, from drones, robotics, AI, and quantum computing that will transform politics, economy, society, and war. Drawing on thinkers such as Zygmunt Bauman and Paul Virilio, the book suggests that future war will be shaped by three broad tendencies that include a broad range of tactics, technologies, and trends: the impure, the granular, and the machinic. Through discussions of cybersecurity, urban war, robotics, AI, climate change, science fiction, and new strategic concepts, it examines how these tendencies might evolve in the different geopolitical futures and types of war ahead of us. The book provides a thought-provoking and distinctive framework through which to think about the changing character of war. It concludes that for all the novel and dangerous challenges ahead, the futuristic possibilities of warfare will likely continue to be shaped by problems familiar to students of international relations and the history of war, albeit problems that will play out in geopolitical and technological contexts that we have never encountered before. This book will be of much interest to students of critical war studies, security studies, science and technology studies, and International Relations in general.

China And Its Embrace of Offensive Cyberespionage Kristan Stoddart, 2025-09-22 The West is under challenge from the rise of China as a global

power Cyberespionage has enhanced China's economy military and political influence and it is now a peer rival to the American led West across land sea air and space China can conduct cyberespionage on a scale that no other nation can currently match Its Belt and Road Initiative is a modern day Silk Route for both overland and maritime trade Under President Xi Jinping China is now much closer to parity in conventional forces should it begin hard power contestation and enter the realm of Thucydides Trap a belief that a rising power will challenge a hegemon Chinese cyberespionage is a real long term challenge to the United States and the West in general This book discusses what the implications are and what might still be to come

America's War against Global Jihad William R. Nester, 2018-03-06 A specter haunts America the specter of Global Jihad Islamic Holy War This specter was never more horrific than on September 11 2001 when nineteen fanatics hijacked four jetliners and used them as guided missiles to destroy the twin World Trade Towers damage the Pentagon murder nearly 3 000 people and cause as much as several hundred billion dollars worth of direct and indirect damage to New York City and the national economy But Jihadists have periodically attacked Americans ever since November 1979 when mobs shouting death to America overran the American embassy in Tehran and held 52 officials hostage for 444 days President George W Bush responded to the September 11 atrocities by declaring a global war

on terror Now in its second decade that war has cost the United States thousands of lives and trillions of dollars Americans are haunted by horrific televised images from across a swath of the Muslim world of bomb blasted cities hundreds of slaughtered bodies thousands of refugees huddled in squalid camps and American journalists in orange jump suits kneeling in the desert before the black robed and masked men who will behead them Americans increasingly question whether the global war on terror has been worth those costs for their own nation and the lands where it is fought This book analyzes America s crusade against Jihadism The key related questions it addresses are these Looking back what were the successes and failures of Washington s counter Jihadist strategy before and after September 11 Looking ahead should Americans stay the course or cut their losses in Iraq Afghanistan and elsewhere Was the catastrophic September 11 attack a one time event or could its equivalent or worse in death and destruction happen again Renowned Harvard professor Samuel Huntington asserted that The underlying problem for the West is not Islamic fundamentalism it is Islam a different civilization whose people are convinced of the superiority of their culture and are obsessed with the inferiority of their power Is that true Just what of Muhammad s words and deeds if any justifies the barbarism of al Qaeda Islamic State and other Jihadists Finally just how corporeal is that specter of global Jihad to the United States A startling surprise awaits the reader in the final chapter as acclaimed expert William Nester weighs the specter of global Jihad against an array of other national security threats

The Politics of Civil-Military Cooperation C. Ankersen, 2014-09-09 Ankersen examines Canada s civil military cooperation efforts in Kosovo Bosnia and Afghanistan through the lens of Clausewitz s Remarkable Trinity The book reveals how military action is the product of influences from the government the armed forces and the people at home

Network Centric Warfare and Coalition Operations Paul T. Mitchell, 2009-02-05 This book argues that Network Centric Warfare NCW influences how developed militaries operate in the same fashion that an operating system influences the development of computer software It examines three inter related issues the overwhelming military power of the United States the growing influence of NCW on military thinking and the centrality of coalition operations in modern military endeavours Irrespective of terrorist threats and local insurgencies the present international structure is remarkably stable none of the major powers seeks to alter the system from its present liberal character as demonstrated by the lack of a military response to US military primacy This primacy privileges the American military doctrine and thus the importance of NCW which promises a future of rapid precise and highly efficient operations but also a future predicated on the digitization of the battle space Participation in future American led military endeavours will require coalition partners to be networked interoperability will therefore be a key consideration of a partner s strategic worth Network Centric Warfare and Coalition Operations will be of great interest to students of strategic studies international security US foreign policy and international relations in general

The Good War M. Williams, 2016-04-30 The Good War tackles the issue of NATO in Afghanistan exploring NATO s evolution in the 1990s and blending NATO s transformation from a reactive defense organization into a pro

active risk manager with the ethic of liberalism It raises questions such as why an alliance built upon the territorial defence of Europe ended up in Afghanistan *Professional Journal of the United States Army* ,2015 *Parameters* ,2015

Worlds of Uncertainty Peter Haldén,2023-12-07 Argues that though we cannot control uncertainty in the world measures can be taken to manage unpredictable events and processes **Military Review** ,2015 Warlike Christians in an Age of Violence Nick Megoran,2017-10-03 How should Christians respond to war This age old question has become more pressing given Western governments recent overseas military interventions and the rise of extremist Islamist jihadism Grounded in conservative evangelical theology this book argues the historic church position that it is inadmissible for Christians to use violence or take part in war It shows how the church s propensity to support the just wars crusades rebellions or humanitarian interventions of its host nations over time has been disastrous for the reputation of the gospel Instead the church s response to war is simply to be the church by preaching the gospel and making peace in the love and power of God The book considers challenges to this argument for gospel peace What about warfare in the Old Testament and military metaphors in the New What of church history And how do we deal with tyrants like Hitler and terrorists like Islamic State Charting a path between just war theory and liberal pacifism numerous inspiring examples from the worldwide church are used to demonstrate effective and authentically Christian responses to violence The author argues that as Christians increasingly drop their unbiblical addiction to war we may be entering one of the most exciting periods of church history

Facing China Jean-Pierre Cabestan,2023-04-24 Jean Pierre Cabestan a China specialist based in Hong Kong provides an overview of Thucydides Trap as coined by political scientist Graham Allison to describe the inescapable conflict between Beijing and Washington Is China s growing power a threat to the United States Could it lead to war between the two nations Economically and militarily stronger and more nationalist than ever the People s Republic of China is increasingly tempted to use force to assert its power especially in its immediate region First the author considers the factors around the threat of war specifically on the Chinese side then presents the three most likely armed conflict scenarios around Taiwan in the South China Sea or in the Senkaku Islands under Japanese control Cabestan also analyses the tensions between China and India along their common borders which were revived in 2020 But the most likely scenario according to Cabestan would be a rapid piecemeal attack aimed at tearing borders apart or defending vested interests not to mention increased cyber warfare It could also manifest itself as the emergence of a new type of cold war punctuated by crises bordering on either a nuclear strike or the use of new weapons U S Chinese tensions and the many potential fronts on which they could elevate are a conflict in waiting which will weigh on the 21st century and dominate international life as China seeks to become entrenched as a dominant world power **NATO and Collective Defence in the 21st Century** Karsten Friis,2017-02-17 This book presents a cutting edge assesement of NATO s collective defence strategies in the immediate aftermath of the NATO Warsaw Summit The chapters in this volume critically assess and discuss the various aspects of the main issues raised and

the different initiatives proposed at the summit including the Very High Readiness Taskforce VJTF nuclear policies of deterrence NATO's presence in the Baltics and Poland and Sweden and Finland's relationship with NATO The book will be a basis and a reference for on going debates and discussions taking place in Europe and North America when it comes to collective defence and NATO's relations to Russia Understanding International Relations Chris Brown, 2019-01-10 The fifth edition of this bestselling textbook offers a comprehensive and engaging introduction to International relations and has been fully updated to cover the dramatic changes in recent world politics Written in the author's unique and engaging style the text explores everything from foreign policy and security to global governance and the global economy to show how the theories and concepts Brown outlines are the only way to make sense of contemporary issues and events With reference to such diverse events as Brexit the Russian armed conflict in Ukraine the financial crisis the rise of China and the challenges of identity politics the author expertly shows how the range of theories presented in the book allow for an understanding of the destabilising events and developments that characterise global politics today and will continue to do so in the future This text remains the definitive guide to understanding international relations and is suitable for undergraduate and postgraduate students of international relations at any stage of their studies New to this Edition Thoroughly updated to showcase the breadth of the latest research and key thinkers in international relations theory Entirely rewritten chapter on the development of human rights and international criminal law Brand new chapter that offers a sophisticated and up to date analysis of the current state of world politics *The New American Way of War* Ben Buley, 2007-10-22 By tracing the origins and evolution of the competing views on the political utility of force this book sets the currently popular image of a new American way of war in its broader historical cultural and political context and provides an assessment of its future prospects

Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14 This volume examines contemporary diplomatic economic and security competition between China and Japan in the Asia Pacific region The book outlines the role that Sino Japanese competition plays in East Asian security an area of study largely overlooked in contemporary writing on Asian security which tends to focus on US China relations and or US hegemony in Asia The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinz Abe and regional security dynamics within and between Asian states institutions since 2012 It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region In doing so the volume draws on a levels of analysis approach to demonstrate the value in looking at security in the Asia Pacific from a regional rather than global perspective The vast majority of existing research on the region's security tends to focus on great power relations and treats Asia as a sub region within the larger global security architecture In contrast this volume shows how competition between the two largest Asian economies shapes East Asia's security environment and drives security priorities across Asia's sub regions As such this collection provides an important contribution to discussion on security in

Asia one with potential to influence both political and military policy makers security practitioners and scholars This book will be of much interest to students of Asian politics regional security diplomacy and international relations *More Than Just War* Charles Jones, 2013-03-12 This book raises questions about the just war tradition through a critical examination of its revival and by juxtaposing it with a literary phenomenology of war Recent public debate about war has leaned heavily on a just war tradition dating back many centuries This book examines the recent revival of that tradition in the United States and Britain arguing that it is less coherent and comprehensive as an approach to the ethical issues arising from war than is generally supposed and that it is inconsistent in important ways with the theology on which it was originally based A second line of criticism is mounted through close readings of modern texts in English from Britain Australia and the USA that together constitute a more subjective bottom up understanding of the moral dilemmas of military life In this second tradition the task of representing war is seen as more problematic and its rationality more questionable than in just war discourse Works by William Shakespeare Sir Walter Scott James Fennimore Cooper Stephen Crane John Buchan Robert Louis Stevenson Joseph Conrad Tim O'Brien and Kurt Vonnegut are featured The book will be of great interest to students and scholars of security studies military studies theology and international relations
