Nice Book Complexity Creative Capacity Environmental Environmental:

Complexity and Creative Capacity Kelly Chapman, 2015-11-06 Complexity theories gained prominence in the 1990s with a focus on self organising and complex adaptive systems Since then complexity theory has become one of the fastest growing topics in both the natural and social sciences and touted as a revolutionary way of understanding the behaviour of complex systems This book uses complexity theory to surface and challenge the deeply held cultural assumptions that shape how we think about reality and knowledge In doing so it shows how our traditional approaches to generating and applying knowledge may be paradoxically exacerbating some of the wicked environmental problems we are currently facing The author proposes an innovative and compelling argument for rejecting old constructs of knowledge transfer adaptive management and adaptive capacity The book also presents a distinctively coherent and comprehensive synthesis of cognition learning knowledge and organizing from a complexity perspective It concludes with a reconceptualization of the problem of knowledge transfer from a complexity perspective proposing the concept of creative capacity as an alternative to adaptive capacity as a measure of resilience in socio ecological systems Although written from an environmental management perspective it is relevant to the broader natural sciences and to a range of other disciplines including knowledge management organizational learning organizational management and the philosophy of science

Handbook on Planning and Complexity Gert de Roo, Claudia Yamu, Christian Zuidema, 2020-06-26 This Handbook shows the enormous impetus given to the scientific debate by linking planning as a science of purposeful interventions and complexity as a science of spontaneous change and non linear development Emphasising the importance of merging planning and complexity this comprehensive Handbook also clarifies key concepts and theories presents examples on planning and complexity and proposes new ideas and methods which emerge from synthesising the discipline of spatial planning with complexity sciences

Ecopolis Dimitra Babalis, 2007 [Environmental Impact Assessment](#) David P. Lawrence, 2003-11-24 This book challenges the prevailing assumption that Environmental Impact Assessment EIA should be structured around a unitary EIA process The book begins by identifying through a scenario eight recurrent problems in EIA practice The characteristics of multiple variations of conventional EIA processes at both the regulatory and applied levels are then presented The residual problems that remain after the conventional processes are described and assessed providing the springboard for a description and analysis of eight alternative EIA processes

Artificial Intelligence and the City Federico Cugurullo, Federico Caprotti, Matthew Cook, Andrew Karvonen, Pauline McGuirk, Simon Marvin, 2023-12-01 This book explores in theory and practice how artificial intelligence AI intersects with and alters the city Drawing upon a range of urban disciplines and case studies the chapters reveal the multitude of repercussions that AI is having on urban society urban infrastructure urban governance urban planning and urban sustainability Contributors also examine how the city far from being a passive recipient of new technologies is influencing and reframing AI through subtle processes of co constitution The

book advances three main contributions and arguments First it provides empirical evidence of the emergence of a post smart trajectory for cities in which new material and decision making capabilities are being assembled through multiple AIs Second it stresses the importance of understanding the mutually constitutive relations between the new experiences enabled by AI technology and the urban context Third it engages with the concepts required to clarify the opaque relations that exist between AI and the city as well as how to make sense of these relations from a theoretical perspective Artificial Intelligence and the City offers a state of the art analysis and review of AI urbanism from its roots to its global emergence It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies urban planning geography architecture urban design science and technology studies sociology and politics **Creative**

The Self The Soul and The World: Affect Reason and Complexity Avijit Lahiri, 2023-10-14 This book looks at the affective cognitive roots of how the human mind inquires into the workings of nature and more generally how the mind confronts reality Reality is an infinitely complex system in virtue of which the mind can comprehend it only in bits and pieces by making up interpretations of the myriads of signals received from the world by way of integrating those with information stored from the past This constitutes a piecemeal interpretation by which we assemble our phenomenal reality In perceiving the complex world and responding to it the mind invokes the logic of affect and the logic of reason the former mostly innate and implicit and the latter generated consciously in explicit terms with reference to mind independent relations between entities in nature It is a strange combination of affect and reason that enables us to make decisions and inferences the latter mostly of the inductive type thereby making possible the development of theories Theories are our tool kits for explaining and predicting phenomena guiding us along in our journey in life Theories however are defeasible and need to be constantly updated at times even radically In this the self and the soul are of enormous relevance The former is the affect based psychological engine driving all our mental processes while the latter is the capacity of the conscious mind to examine and reconstruct the self by modulating repressed conflicts If the soul remains inoperative all our theories become misdirected and a rot spreads inexorably all around us

Complexity-intelligence Strategy: A New Paradigmatic Shift Thow Yick Liang, 2016-12-15 The Newtonian mindset has dominated the entire human world for more than three centuries It has provided the necessary knowledge theories and conceptual foundation that supported the industrial revolution hierarchical leadership and governance deliberate planning and strategy and operational control of all organizations However over the last few decades constraints and incoherency are emerging due to new accelerants and elevating complexity density The new situation and dynamics and the multi dimensional changes require a fresh thinking and deeper comprehension that is beyond the boundaries of the exact sciences As the continuity of human existence requires a new global order to be established a paradigmatic shift is essential This book provides the foundation for nurturing the new intelligence mindset that is critical in the present context Fundamentally the intelligence mindset encompasses intelligence consciousness centricity complexity

centricity network centricity and stability centricity and constructionist thinking as its foundation pillars The conceptual foundation of this new paradigmatic shift is presented as the intelligent organization theory and the theory of relativistic complexity The intelligent organization theory encompassing iCAS iCAD self centricity stability centricity organizing around intelligence localized order mental cohesion also provides a conceptual foundation to certain thinking and dynamics associated with Brexit and the current US under President Donald Trump
