It is designed to be an essential and accessible reference for readers at any level of experience. This editorial approach encompasses the importance of the first encounter between patient and clinician followed by the complex task of beginning to develop a therapeutic relationship and to develop and implement a treatment plan in collaboration with the patient. The importance of increasing attention to the role of culture and social determinants of mental health is reflected both in specific chapters and in components of many chapters throughout the book, especially in those pertaining to clinical evaluation, the therapeutic alliance, and treatment. The global scope of this edition is reflected throughout the book, including the section on psychiatric disorders where evaluation using both ICD-11 and DSM-5 TR is discussed. Most chapters are authored by experts from at least two different countries or continents, adding a critically important dimension which often is missing in major psychiatric textbooks.
