Video Icons & Values Alan M. Olson, Christopher Parr, Debra Parr, 1991-01-01 This book focuses on the most powerful agency of value formation in our time the video image as purveyed through television and mass media Special

attention is given to the impact of television on education and the challenges of instructing a generation of children who have never known a time before television. Both the negative and the positive implications and consequences of video technology are discussed in the book by a range of experts in the humanities and social sciences. Among the prominent issues and questions: How does television function as an agent of value formation? What is the impact of conventional commercial format on values and critical judgment? What is a video text and how is it different from a conventional text? How do we develop the instructional tools to teach people to be critical viewers? What is television's place in the arts and what is a video artist? What happens to consciousness after viewing 30,000 or more hours of television by the time an individual graduates from high school? Is the growing problem of illiteracy directly attributable to television? The social and moral implications of television during its second 50 years will be profound and far-reaching. The authors of *Video Icons and Values* provide valuable clues as to what these implications are, will be, and what can be done about them. **Nonlinear Dynamics and Complexity**

Valentin Afraimovich, Albert C. J. Luo, Xilin Fu, 2013-11-22. This important collection presents recent advances in nonlinear dynamics including analytical solutions, chaos in Hamiltonian systems, time delay, uncertainty, and bio network dynamics. *Nonlinear Dynamics and Complexity* equips readers to appreciate this increasingly mainstream approach to understanding complex phenomena in nonlinear systems as they are examined in a broad array of disciplines. The book facilitates a better understanding of the mechanisms and phenomena in nonlinear dynamics and develops the corresponding mathematical theory to apply nonlinear design to practical engineering. *Late-Night in Washington* Stephen J.

Farnsworth, S. Robert Lichter, Farah Latif, 2023-09-01. This book traces the trajectory of late night political humor which has long been a staple of entertainment television and is now a prominent part of social media political discourse especially when it comes to the presidency. From Richard Nixon on *Laugh In* to Donald Trump's avatar on *Saturday Night Live*, this book takes the next step and considers how late night comedy treats Joe Biden, the new American president who strives to restore a civil public tone but offers far less comedy fodder than his predecessor. Employing content analysis, public opinion surveys, and a variety of other quantitative and qualitative research, the authors look beyond the day-to-day memes and mimes of late night comics and show how political humor may evolve. For students and scholars of politics and the media, this book will appeal to the general public and political pundits as well. *Godfit* John Hayden, 2015-03-30. Understanding how fitness relates to our relationship with God and our ability to be a servant for His kingdom is crucial for discipleship. GODFIT is a training manual, devotional, and online resource to educate, challenge, and motivate you to understand your calling to serve and to be able to take action.
