American Coach Ivan Maisel, 2025-09-16 Award winning sportswriter Ivan Maisel brings the forgotten legend of Notre Dame head football coach Frank Leahy back to life based on rare and complete access to Fighting Irish football historical archives and the Leahy family When Frank Leahy retired from Notre Dame after the 1953 season he had the second best record in the history of the game 107 13 9 864 second only to Knute Rockne his college coach and mentor Seven decades later he still does Rockne created the image of Notre Dame then a small Catholic university in a remote town in northern Indiana as the premier college football program in the nation But it was Leahy who secured that image with six undefeated seasons and four national championships in an 11 season span By achievement alone Leahy should be as beloved as Rockne who nearly a century after his tragic death remains a legend Yet Leahy is virtually forgotten today in many ways a victim of his own insatiable need to compete and win The University of Notre Dame granted Ivan Maisel rare and complete access to its voluminous cache of historical material and Maisel has the cooperation of Leahy's family enabling him to tell the rich story of an archetypal coach who was a celebrity in his day Leahy made the cover of Time magazine and befriended presidents and movie stars alike Leahy brought innovation to a program reluctant to change anything Rockne had done But Leahy rankled opposing coaches and clashed with the priests at Notre Dame who sought to make the university as elite in academia as it had become on the field These conflicts coupled with the toll that Leahy's

innate drive demanded of his health brought his career to a premature end hampering his legacy in the years to come And what a legacy only Nick Saban and Bear Bryant have won more national titles The records of iconic coaches such as Bobby Bowden Woody Hayes and Eddie Robinson pale in comparison Not only the Notre Dame fanbase but all college football fans will be hungry to rediscover a man and an era the story of how Frank Leahy cemented Notre Dame s status as the defining program of college football

Reconstructing the International Tax System Elizabeth Rosenthal,2025-05-27 Source based taxation and the arm s length standard have been foundational elements of the international tax system for many decades With the advent of the highly digitalized platform firm the OECD and many other stakeholders assert that these principles have been rendered obsolete In their stead these stakeholders have proposed an alternative hybrid international tax system Under this proposed hybrid system the long standing profit allocation rules would be applied in the first instance to determine the preliminary attribution of in scope multinational firms taxable income to individual taxing jurisdictions These results would then be subject to a secondary reallocation designed to ensure that a portion of such firms taxable income is attributed to and taxable by jurisdictions in which consumers and users reside market jurisdictions This secondary allocation the core of the OECD s Pillar One and an essential element of its two pronged Pillar One Pillar Two Solution explicitly deviates from both the arm s length standard and the principle of source based taxation For many reasons examined in this book the OECD s Pillar One would not provide for the effective taxation of highly digitalized platform firms and by extension it would not stabilize the international tax system The author argues that source based taxation and the arm s length standard are entirely compatible with the attribution of a portion of highly digitalized platform firms taxable income to market jurisdictions However new transfer pricing methodologies and a revised definition of control for transfer pricing purposes are required to achieve this result Combining important findings and insights from academic research in a variety of fields with the author s extensive practical experience in both public and private spheres this book is appropriate for academics as well as private sector advisors in the fields of transfer pricing and international tax chief financial officers of multinational corporations and tax policy analysts
