Sound Tactics Justin Eckstein,2025-03-25 From call and response chants to the noise of pots and pans protests are often defined by their sounds In this book Justin Eckstein argues that this is not merely the result of catchy slogans it is due to sound s ability to hold those in power accountable Sound Tactics highlights how in a world grappling with the uncertainty of emergent digital practices social movements utilize the rhetorical power of sound Eckstein uses the waveform as a metaphor for the persuasive potential of sound Examining the case studies of the March for Our Lives protest Howard University s HUResist movement and the Casseroles protest in Montreal Eckstein demonstrates how changes to the immediacy intensity and immersiveness of sound can affect the power of an argument The collective use of sound in these case studies conveys the unity of the protestors in their demand for change and underlines the strength of their argument to those in power More than just the written word spoken aloud sound has unique layers of added meaning it

can convey length of time demand attention and signal disapproval Eckstein's study unpacks those layers for scholars and students as well as activists interested in deploying sound for change

Practical Machine Learning: From Pictures to the Cloud 2025 AUTHOR:1-Praneet Amul Akash Cherukuri AUTHOR:2-Dr. Santosh Kumar Henge, PREFACE The past decade has moved machine learning from academic curiosity to an invisible utility pulsing through every photograph we snap and every swipe we make A face unlocks a phone a drone inspects a bridge a doctor consults an algorithm before a diagnosis all powered by models that see learn and act in real time Yet for students and engineers stepping into the field the journey from inquisitive Hello world notebook to a production grade model running on an edge

device or a cloud endpoint can feel disjointed and opaque Practical Machine Learning From Pictures to the Cloud was born of that gap In our classrooms and industry collaborations at S R University we watched learners master isolated concepts convolutional layers hyper parameter tuning REST APIs without a blueprint that tied them together This book offers that blueprint We start with raw pixels guide you through feature engineering and modern deep learning architectures and then scale the conversation outward how to train responsibly deploy at cloud scale monitor for drift and govern for fairness and privacy What makes the text practical is its bias toward end to end reproducibility Every chapter couple s theory with hands on labs drawn from real engagements in health care smart cities retail and autonomous systems Code examples ship as containerised notebooks pipeline diagrams map directly to the managed services of AWS Google Cloud Azure and open source stacks like Kubeflow and Feast Whether your workstation is a laptop or a GPU cluster you can follow the same lifecycle we use in production Equally vital is the ethical lens threaded throughout As image models grow more capable they also magnify risks bias surveillance ecological cost You will find checklists case studies and policy references alongside optimisation tricks because robustness and responsibility are no longer optional extras they are success criteria The book is organised in three movements 1 Seeing fundamentals of image data classical vision and modern convolutional transformer networks 2 Learning advanced training techniques transfer learning hyper parameter tuning and explainability 3 Serving scalable pipelines cloud deployment edge inference monitoring cost governance and compliance Our intended audience spans senior undergraduates graduate students and practitioners who know basic Python and linear algebra but want to take the leap into full stack machine learning engineering We owe gratitude to our students whose incisive questions shaped the narrative and to industry partners who opened their architectures for case studies Any errors that remain are ours alone We hope this book becomes your desk companion as you turn pixels into insights and models into value responsibly reproducibly and at scale Authors Rhythm and Vigilance Vita Peacock,Mikkel Kenni Bruun,Claire Elisabeth Dungey,Matan
