American Made Dan DiMicco, 2015-03-03 American manufacturing is on life support at least that's what most people think The exodus of jobs to China and other foreign markets is irreversible and anything that is built here requires specialized skills the average worker couldn't hope to gain Not so says Dan DiMicco chairman and former CEO of Nucor America's largest steel company He not only revived a major US manufacturing firm during a recession but helped galvanize the flagging domestic steel industry when many of his competitors were in bankruptcy or headed overseas In American Made he takes to task the politicians academics and political pundits who he contends are exacerbating fears and avoiding simple solutions for the sake of nothing more than their own careers and contrasts them with the postwar leaders who rebuilt Europe and Japan put a man on the moon and kept communism at bay We need leaders of such resolve today he argues who can tackle a broken job creation engine by restoring manufacturing to its central role in the US economy and cease creating fictitious service businesses where jobs evaporate after a year or two as in a Ponzi scheme With his trademark bluntness DiMicco tackles the false promise of green jobs and the hidden costs of outsourcing Along the way he shares the lessons he's learned about good leadership crisis management and the true meaning of innovation and maps the road back to robust economic growth middle class prosperity and American competitiveness *The Boy Kings* Katherine Losse, 2012-06-26 Kate Losse was a grad school refugee when she joined Facebook as employee 51 in 2005 Hired to answer user questions such as What is a poke and Why can't I access my ex girlfriend's profile her early days at the company were characterized by a sense of camaraderie promise and ambition Here was a group of scrappy young upstarts on a mission to rock Silicon Valley and change the world Over time this sense of mission became so intense that working for Facebook felt like more than just a job

it implied a wholehearted dedication to the cause Employees were incentivized to live within one mile of the office summers were spent carousing at the company pool house and female employees were told to wear T shirts with founder Mark Zuckerberg s profile picture on his birthday Losse started to wonder what this new medium meant for real life relationships Would Facebook improve our social interactions Or would we all just adapt our behavior to the habits and rules of these brilliant but socially awkward Internet savants who have become today s youngest power players Increasingly skeptical Losse graduated from customer service to the internationalization team tasked with rolling out Facebook to the rest of the world finally landing a seat right outside Zuckerberg s office as his personal ghostwriter the voice of the boy king This book takes us for the first time into the heart of this fast growing information empire inviting us to high level meetings with Zuckerberg lifting the veil on long nights of relentless hacking and trolling taking us behind the scenes of raucous company parties and introducing us to the personalities values and secret ambitions of the floppy haired boy wonders who are redefining the way we live love and work By revealing here what s really driving both the business and the culture of the social network Losse answers the biggest question of all What kind of world is Facebook trying to build and is it the world we want to live in Logging on to Facebook that first day in retrospect was the second and to date the last time that any technology has captured my imagination The first was when Apple advertised the first laptop the PowerBook in the 1990s with the words What s on your PowerBook World domination my teenaged self answered instinctively That s what these devices were made for I thought so small and yet so powerful so capable of linking quickly to and between everything else in the world From the laptop I could write and distribute information faster than ever before It was intoxicating to imagine and Facebook s sudden faithful rendering in 2004 of the physical world into the virtual felt the same What could you do now that you could see and connect to everyone and everything instantly But what also could be diminished by such quick access In the realm of ideas it seemed easy Who wouldn t want to distribute and discuss ideas widely However in the realm of the personal it seemed more complicated What was the benefit of doing everything in public Is information itself neutral or do different types of information have different values different levels of expectation of privacy different implications for distribution and consumption Should all information be shared equally quickly and without regard to my relationship to it And finally and most important as we ask whenever we begin a new relationship with anything would this be good for me From the Introduction
