Jauhar, 2025-06-23 There may be up to 10 million Indians living with Alzheimer's disease or related dementias and that number is expected to increase dramatically in the next few decades What is it like to live with and amid this increasingly prevalent condition an affliction that some fear more than death In *My Father's Brain* the distinguished physician and author Sandeep Jauhar sets his father's descent into Alzheimer's alongside his own journey toward understanding this disease and how it might best be coped with if not cured In an intimate memoir rich with humour and heartbreak Jauhar relates how his immigrant father and extended family felt quarrelled and found their way through the dissolution of a cherished life Along the way he lucidly exposes what happens in the brain as we age and our memory falters and explores everything from the history of ancient Greece to the most cutting edge neurological and bioethical research Throughout *My Father's Brain* confronts the moral and psychological concerns that arise when family members must become caregivers when children's and parents' roles reverse and when we must accept unforeseen turns in our closest relationships and in our understanding of what it is to have a self The result is a work of essential insight into dementia and into how scientists caregivers and all of us in an aging society are reckoning with the fallout *Breaking the Mould* Raghuram Rajan, Rohit Lamba, 2023-12-07 Where is

India going today Is it surging forward having just overtaken the United Kingdom to become the fifth largest economy in the world Or is it flailing unable to provide jobs for the millions joining the labour force What should India do to secure a better future India is at a crossroads today Its growth rate while respectable relative to other large countries is too low for the jobs our youth need Intense competition in low skilled manufacturing increasing protectionism globally and growing automation make the situation still more difficult Divisive majoritarianism does not help India broke away from the standard development path from agriculture to low skilled manufacturing then high skilled manufacturing and finally services a long time back by leapfrogging the intermediate steps Rather than attempting to revert to development paths that may not be feasible any more we must embark on a truly Indian path In this book the authors explain how we can accelerate economic development by investing in our people's human capital expanding opportunities in high skilled services and manufacturing centred on innovative new products and making India a ferment of ideas and creativity India's democratic traditions will support this

path helped further by governance reforms including strengthening our democratic institutions and greater decentralization. The authors offer praise where the Indian establishment has been successful but are clear eyed in pointing out its weaknesses. They urge India to break free from the shackles of the past and look to the possibilities of the future. Written with unusual candour and packed with vivid examples and persuasive arguments this is a book for anyone who has a stake in India's future.
