The Map in the Machine Luis F. Alvarez Leon,2024-05-07 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In The Map in the Machine Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital

capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change

Android vs iPhone Kai Turing,2024-10-16 Android vs iPhone A Layman s Guide to the Smartphone Divide tackles the complex world of mobile technology focusing on the two dominant forces in the industry This accessible book explores the fundamental differences between Android and iPhone through three key areas operating systems hardware ecosystems and user experience It argues that smartphone choice goes beyond features reflecting personal needs and preferences in our increasingly digital lives The book guides readers through a logical progression starting with basic concepts of mobile operating systems and hardware before delving into specific characteristics of Android and iPhone It then examines how these differences impact real world usage scenarios discussing implications for privacy productivity and digital lifestyle What sets this guide apart is its focus on the average user prioritizing practical concerns over technical specifications It incorporates case studies expert interviews and interdisciplinary connections to psychology and economics grounding complex concepts in relatable contexts By balancing informative content with accessibility this book empowers readers to make informed decisions about their

technology use It addresses controversies objectively encouraging readers to form opinions based on facts rather than brand loyalty Whether you re a curious teenager or an adult seeking to navigate the smartphone landscape this guide offers valuable insights into the Android vs iPhone divide *Mapping and the Citizen Sensor* Giles Foody,Linda See,Steffen Fritz,Peter Mooney,Ana-Maria Olteanu-Raimond,Cidália Costa Fonte,Vyron Antoniou,2017-09-11 Maps are a fundamental resource in a diverse array of applications ranging from everyday activities such as route planning through the legal demarcation of space to scientific studies such as those seeking to understand biodiversity and inform the design of nature reserves for species conservation For a map to have value it should provide an accurate and timely representation of the phenomenon depicted and this can be a challenge in a dynamic world Fortunately mapping activities have benefitted greatly from recent advances in geoinformation technologies Satellite remote sensing for example now offers unparalleled data acquisition and authoritative mapping agencies have developed systems for the routine production of maps in accordance with strict standards Until recently much mapping activity was in the exclusive realm of authoritative agencies but technological development has also allowed the rise of the amateur mapping community The proliferation of inexpensive and highly mobile and location aware devices together with Web 2 0 technology have fostered the emergence of the citizen as a source of data Mapping presently benefits from vast amounts of spatial data as well as people able to provide observations of geographic phenomena which can inform map production revision and evaluation The great potential of these developments is however often limited by concerns The latter span issues from the nature of the citizens through the way data are collected and shared to the quality and trustworthiness of the data This book reports on some of the key issues connected with the use of citizen sensors in mapping It arises from a European Co operation in Science and Technology COST Action which explored issues linked to topics ranging from citizen motivation data acquisition data quality and the use of citizen derived data in the production of maps that rival and sometimes surpass maps arising from authoritative agencies Evaluation and comparison of Ajax Frameworks regarding applicability, productivity and technical limitations Lukas Ostermaier,2008-03-11 Inhaltsangabe Abstract For some years the Internet has been dominated by phrases like Web 2 0 and Ajax The catchword Web 2 0 which was originally established by O Reilly at the first Web 2 0 conference in October 2004 not only describes a new way of perception and usage of the internet e g social software like blogs wikis etc but also stands for more or less innovative techniques as for instance RSS or Ajax The latter is a combination of techniques that have been available since the late 1990s such as JavaScript asynchronous requests and XML However the term Ajax only exists since Jesse James Garret introduced it in his article in February 2005 Since then Ajax has experienced a real hype Google Mail Google Maps or Flickr just serve as examples for the mass of applications that have to attribute their success substantially to Ajax When it comes to web application development there has also been a lot of progress in the field of Ajax Ajax frameworks of all kinds massively gained popularity and flooded the development community From the biggest companies through to small development teams

almost everyone has published his own Ajax framework or library in the last two years In the meantime there are far more than 150 different frameworks for various programming languages and diverse aims Because of this uncontrolled growth of frameworks it is quite difficult to say which of those is most suitable for a specific project There are two key questions that have to be considered in case of Ajax or Rich Internet Applications RIAs in general How can Ajax significantly increase the business value of an application and how can it be applied productively This thesis mainly focuses on the latter question by evaluating three Ajax frameworks of large companies with a strong background by means of an example application with respect to commercial applicability productivity performance as well as enhancement and adaptation possibilities Furthermore this work discusses the technical limitations and problems of Ajax and provides an outlook on future developments in this area As example application for the evaluation a web based tracking system for public transportation is implemented Each single vehicle is visualized on a street map according to its current position By the implementation of this application with each of the three chosen Ajax frameworks their applicability productivity and performance is illustrated as well as
