Detracking Math Courses** Angela Torres,Ho Nguyen,Elizabeth Hull Barnes,Laura Wentworth,2023-05-03 Create a pathway
to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However
research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying
them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting
some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition
building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The
ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for
students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School
District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on
detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real
world examples lessons learned and prompts to provoke discussion about your own context the book walks you through
Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in
scheduling curriculum professional development and coaching Supporting and improving the policy through continuous
research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance
equity in your school or district s mathematics education and also provides practical information to help students in a
