Reddit Reading Comprehension How To:

From Text to Epitext Shelbie Witte, Melissa Gross, Don Latham, 2021-03-02 This volume explains how analyzing textual elements that aren't part of the text but connected to it can be used with K-16 students to improve comprehension, engagement, critical thinking, and media literacy. Beginning with an introduction that briefly explains Genette's theory of paratext and discusses the functions of epitext theory, this book comprises theory-to-practice chapters that showcase ways in which teachers and librarians can use elements independent of a text to discuss texts and media with students. Chapters include a practitioner's section specifying practical approaches and explanations for how to use epitext. Scaffolding an application of theory to practice, this title provides educators with an original approach to increasing literacy engagement and integration as well as for increasing media literacy and critical thinking. It includes practical ideas for using epitext in the classroom to promote critical thinking and for collaboration between teachers and librarians. It also includes editorial sidebars that provide additional how-to ideas, support deep thinking, make connections to relevant content in other chapters, and provide examples for students in K-16 classrooms.

Machine Reading Comprehension Chenguang Zhu, 2021-03-20 Machine reading comprehension (MRC) is a cutting-edge technology in natural language processing (NLP). MRC has recently advanced significantly, surpassing human parity in several public datasets. It has also been widely deployed by industry in search engines and quality assurance systems. Machine Reading Comprehension: Algorithms and Practice performs a deep dive into MRC, offering a resource on the complex tasks this technology involves. The title presents the fundamentals of NLP and deep learning before introducing the task models and applications of MRC. This volume gives theoretical treatment to solutions and gives detailed analysis of code and considers applications in real-world industry. The book includes basic concepts, tasks, datasets, NLP tools, deep learning models, and architecture, and insight from hands-on experience. In addition, the title presents the latest advances from the past two years of research. Structured into three sections and eight chapters, this book presents the basis of MRC, MRC models, and hands-on issues in application. This book offers a comprehensive solution for researchers in industry and academia who are looking to understand and deploy machine reading comprehension within natural language processing. Presents the first comprehensive resource on machine reading comprehension (MRC). Performs a deep dive into MRC from fundamentals to latest developments. Offers the latest thinking and research in the field of MRC, including the BERT model. Provides theoretical discussion, code analysis, and real-world applications of MRC. Gives insight from research which has led to surpassing human parity in MRC.
