generally **Scientific Research and Methodology** Peter K. Dunn,2025-08-19 This textbook is designed for teaching quantitative research in the scientific health and engineering disciplines at first year undergraduate level with an emphasis on statistics It covers the research process including asking research questions research design data collection summarising data analysis and communication Many real journal articles are used throughout the text as examples that demonstrate the use of the techniques Students are introduced to statistics as a method for answering questions Descriptive research questions lead to analysis of single proportions and means Repeated measures research questions are answered using paired quantitative data Relational research questions compare proportions odds and means in different groups Correlational research questions are studied using correlation and regression techniques Statistical topics include numerical summary methods such as means odds ratios and identification of outliers graphing such as histograms case profile plots and scatterplots confidence intervals and hypothesis testing Emphasis is placed on understanding and concepts while calculations are shown in simple situations they are deferred to software when the computations become tedious and disruptive to understanding Almost every dataset used is a real dataset and is available online or in an associated R package SRMData Software output is often used when calculations become onerous The output is sufficiently generic that the book can be used in conjunction with any statistical software *Introduction to Scientific Research Projects* Graham Basten,2011

The Internet Research Handbook Niall Ó Dochartaigh,2002 Ideal as a course textbook at undergraduate and graduate level in a range of social science disciplines where doing a research project is an integral part of the course It will also be of great use to postgraduate students who are about to start research for a dissertation and for experienced academic researchers who are trying to incorporate the Internet into their research practice **Access to Scientific Research** David J. Brown,2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future **Conducting Online Research on Amazon Mechanical Turk and Beyond** Leib Litman,Jonathan

Robinson,2020-05-12 Conducting Online Research on Amazon Mechanical Turk and Beyond written by Leib Litman and Jonathan Robinson provides both students and experienced researchers with essential information about the online platforms most often used for social science research This insightful and accessible text answers common questions like How do I maintain data quality in online studies What is the best way to recruit hard to reach samples and How can researchers navigate the ethical issues that are unique to online research Drawing on their experiences as the founders of CloudResearch formerly TurkPrime the authors provide information that guides new users planning their first online studies and engages

even the most experienced researchers with detailed discussions about the challenges of online research The book begins with an overview of Amazon's Mechanical Turk and its rapid rise within academic research Then the authors describe how to set up an MTurk study with screenshots that walk readers through the steps of creating an account designing a study collecting data and using third party applications to enhance MTurk's functionality Later chapters provide readers with a detailed understanding of the MTurk environment and use data from hundreds of thousands of participants and tens of millions of completed tasks to dive into issues like participant demographics sources of sampling bias and the generalizability of findings from MTurk Finally the book explores the benefits of using other online platforms as a complement to MTurk and the ethical issues that are unique to conducting research with online participant platforms Throughout the book the authors share hands on advice and best practices such as those for conducting longitudinal studies or carrying out complex studies Altogether the mix of data insight and advice make this book an essential resource for researchers who want to understand the online environment and the most effective ways to conduct research online
