Convergence of Blockchain and Internet of Things in Healthcare Arun Kumar Rana, Vishnu Sharma, Ajay Rana, Maksud Alam, Suman Lata Tripathi, 2024-04-22 The Internet of Things IoT and blockchain are two new technologies that combine elements in many ways A system where the virtual and physical worlds interact is created by integrating pervasive computing ubiquitous computing communication technologies sensing technologies Internet Protocol and embedded devices A massive number of linked devices and vast amounts of data present new prospects for developing services that can directly benefit the economy environment society and individual residents Due to the size of IoT and insufficient data security security breaches may have a huge impact and negative effects IoT not only connects gadgets but also people and other entities leaving every IoT component open to a wide variety of assaults The implementation and application of IoT and blockchain technology in actual scientific biomedical and data applications are covered in this book The book highlights important advancements in health science research and development by applying the distinctive capabilities inherent to distributed ledger systems Each chapter describes the current uses of blockchain in

real world data collection medicine development device tracking and more meaningful patient interaction All of these are used to create opportunities for expanding health science research This paradigm change is studied from the perspectives of pharmaceutical executives biotechnology entrepreneurs regulatory bodies ethical review boards and blockchain developers

Key Features Provides a foundation for the implementation process of blockchain and IoT devices based on healthcare related technology Image processing and IoT device researchers can correlate their work with other requirements of advanced technology in the healthcare domain Conveys the latest technology including artificial intelligence and machine learning in healthcare related technology Useful for the researcher to explore new things like security cryptography and privacy in healthcare related technology Tailored for people who want to start in healthcare related technology with blockchain and IoT This book is primarily for senior undergraduates graduate students and academic researchers in the fields of electrical engineering electronics and communication engineering computer science and engineering and biomedical engineering
