Facebook Nation Newton Lee, 2022-02-02 This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India and the United States. Social media has enabled its users to inform and misinform the public to appease and disrupt Wall Street to mitigate and exacerbate the COVID-19 pandemic and to unite and divide a country. Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." He should have heeded his own words. In October 2021, former Facebook manager turned whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products harm children, stoke division and weaken our democracy. This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats to government and activism as well as the pros and cons of total information awareness including the Edward Snowden leaks. Highly recommended. *T.D. Richardson*, *Choice Magazine*. A great book for social media experts. *Will M. AdWeek*. Parents in particular would be well advised to make this book compulsory reading for their teenage children. *David B. Henderson*, *ACM Computing Reviews*.

Video Nation Jefferson Graham, 2013 All kinds of people are creating video for the web: bloggers, small business owners, web show hosts and corporate marketing departments to name just a few. How do the best videos get made and go viral? What secrets lie behind them? In *Video Nation* you'll learn everything you need to make great looking video for YouTube, Facebook or your blog from one of the top experts around. Cover , **Harness the**

Big Data and Competition Law Alptekin Koksal, 2023-11-13 Recent studies on competition law and digital markets reveal that accumulating personal information through data collection and acquisition methods benefits consumers considerably Free of charge fast and personalised services and products are offered to consumers online Collected data is now an indispensable part of online businesses to the point that a new economy a data driven sector has emerged Many markets such as the social network search engine online advertising and e commerce are regarded as data driven markets in which the utilisation of Big Data is a requisite for the success of operations However the accumulation and use of data brings competition law concerns as they contribute to market power in the online world resulting in a few technology giants gaining unprecedented market power

due to the Big Data accumulation indirect network effects and the creation of online ecosystems As technology giants have billions of consumers worldwide data driven markets are truly global In these data driven markets technology giants abuse their dominant positions but existing competition law tools seem ineffective in addressing market power and assessing abusive behaviour related to Big Data This book argues that a novel approach to the data driven sector must be developed through the application of competition law rules to address this It argues that current and potential conflicts can be mitigated by extending the competition law assessment beyond the current competition law tools to offer a modernised and unified approach to the Big Data related competition issues Promoting new legal tests for addressing the market power of technology giants and assessing abusive behaviour in data driven markets this book advocates for cooperation between competition and data protection authorities It will be of interest to students academics and practitioners with an interest in competition law and data protection
