Medical Proofs, Social Experiments

Catherine Will, Tiago Moreira, 2016-04-22 Clinical trials have become key technologies for decision making in the contemporary world Their results shape medical practice and determine priorities across health care systems but the work that goes into producing credible data is often hidden Medical Proofs Social Experiments draws upon detailed case studies to argue that to understand their value we need to pay more attention to the contexts for these modern medical experiments recovering the diverse ways in which they involve doctors patients and the public the local practices that contribute to their completion and the complex negotiation of their results in professional and statutory institutions Presenting research from the UK USA Sweden and The Netherlands the ethnographic perspective adopted by the authors provides a space to explore the investments of different state market professional and other actors in particular forms of evaluation and the ways in which trial methodologies may be re designed or re imagined to satisfy social and political expectations As such this volume will be of interest to those working in the fields of science and technology studies the sociology and anthropology of medicine and researchers of policy and organisation in health care

The Sociology of Medical Screening

Natalie Armstrong, Helen Eborall, 2012-06-12 The Sociology of Medical Screening Critical Perspectives New Directions presents a series of readings that provide an up to date overview of the diverse sociological issues relating to population based medical screening Features new research data in most of the contributions Includes contributions from eminent sociologists such as David Armstrong Stefan Timmermans and Alison Pilnick Represents one of the only collections to specifically address the sociology of medical screening

Situated Intervention Teun Zuiderent-Jerak, 2015-08-07 An exploration of sociological research that is neither detached nor engaged a new approach to sociological knowledge production with examples from health care In this book Teun Zuiderent Jerak considers how the direct involvement of social scientists in the practices they study can lead to the production of sociological knowledge Neither detached sociological scholarship nor engaged social science this new approach to sociological research brings together two activities often viewed as belonging to different realms intervening in practices and furthering scholarly understanding of them Just as the natural sciences benefited from broadening their scholarship from theorizing to experiment so too could the social sciences Additionally Zuiderent Jerak points out rather than proceeding from a pre set normative agenda scholarly intervention allows for the experimental production of normativity Scholars are far from detached but still may be surprised by the normative outcomes of the interactions within the experiment Zuiderent Jerak illustrates situated intervention research with a series of examples drawn from health care Among the topics addressed are patient compliance in hemophilia home care the organization of oncology care and the value of situated standardization the relationship between standardization and patient centeredness the development of patient centered pathways value driven and savings driven approaches to the construction of health care

markets and multiple ontologies of safety in care for older adults Finally returning to the question of normativity in sociological research Zuiderent Jerak proposes an ethics of specificity according to which research adapts its sociological responses to the practices studied Sociology not only has more to offer to the practices it studies it also has more to learn from them

An Anthropology of Biomedicine Margaret M. Lock,Vinh-Kim Nguyen,2018-01-09 In this fully revised and updated second edition of An Anthropology of Biomedicine authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health

Making Diabetes Arlena Siobhan Liggins,2020-01-06 Diabetes is regarded as one of the most challenging global health issues of the 21st century Especially countries with weak health infrastructure are struggling to deal with the increased demands this chronic disease entails Tracing the effects of a diagnostic device the glucometer this book examines how it contributes to the making of diabetes in contemporary Uganda Arlena S Liggins demonstrates that depending on who uses the glucometer the outcomes may go far beyond diagnosis The book draws a complex picture of hopes and misplaced expectations of trust and mistrust in a technology to which access in the first place is all but a given

Routledge Handbook of Body Studies Bryan Turner,2012-07-24 In the last three decades the human body has gained increasing prominence in contemporary political debates and it has become a central topic of modern social sciences and humanities Modern technologies such as organ transplants stem cell research nanotechnology cosmetic surgery and cryonics have changed how we think about the body In this collection of thirty original essays by leading figures in the field these issues are explored across a number of theoretical and disciplinary perspectives including pragmatism feminism queer theory post modernism post humanism cultural sociology philosophy and anthropology A wide range of case studies which include cosmetics diet organ transplants

racial bodies masculinity and sexuality eating disorders religion and the sacred body and disability are used to appraise these different perspectives In addition this Handbook explores various epistemological approaches to the basic question what is a body It also offers a strongly themed range of chapters on empirical topics that are organized around religion medicine gender technology and consumption It also contributes to the debate over the globalization of the body how have military technology modern medicine sport and consumption led to this contemporary obsession with matters corporeal The Handbook s clear direct style will appeal to a wide undergraduate audience in the social sciences particularly for those studying medical sociology gender studies sports studies disability studies social gerontology or the sociology of religion It will serve to consolidate the new field of body studies Health and Other Unassailable Values Kirsten Bell,2016-12-01

Health and Other Unassailable Values sets out to examine health as a core cultural value Taking health evidence and ethics as her primary themes Bell explores the edifice that underpins contemporary conceptions of health and the transformations in how we understand it assess it and enact it Although health evidence and ethics have always been important values she demonstrates that the grounds upon which they are grasped today are radically different from how they were formulated in the past Divided into three parts Part I focuses on the rise of epidemiology Part II examines the emergence of evidence based medicine and Part III explores the broader ethical turn in health and medicine Through an examination of core concepts including health behaviour the randomised controlled trial informed consent and human rights Bell illustrates the ways in which certain entrenched ideas and assumptions about how human beings think and act recur across a variety of settings An array of topical case studies including cigarette packaging legislation the incorporation of male circumcision as an HIV prevention tool cancer screening technologies and e cigarettes ground the arguments presented Written in a clear and engaging style this volume will be of interest to a wide range of scholars and students especially those in medical anthropology medical sociology and public health Clear chapter delineations make the work easy to engage with at the individual chapter level as well as a whole **Collaborators Collaborating** Monica Konrad,2012-05-01

As bio capital in the form of medical knowledge skills and investments moves with greater frequency from its origin in First World industrialized settings to resource poor communities with weak or little infrastructure countries with emerging economies are starting to expand new indigenous science bases of their own The case studies here from the UK West Africa Sri Lanka Papua New Guinea Latin America and elsewhere explore the forms of collaborative knowledge relations in play and the effects of ethics review and legal systems on local communities and also demonstrate how anthropologically informed insights may hope to influence key policy debates Questions of governance in science and technology as well as ethical issues related to bio innovation are increasingly being featured as topics of complex resourcing and international debate and this volume is a much needed resource for interdisciplinary practitioners and specialists in medical anthropology social theory corporate ethics science and technology studies **Glocal Pharma** Ericka Johnson,Ebba Sjögren,Cecilia Åsberg,2016-05-12

An exploration of how global pharmaceutical products are localized of what happens when they become glocal this book examines the tensions that exist between a global pharmaceutical market and the locally bounded discourses and regulations encountered as markets are created for new drugs in particular contexts Employing the case study of the emergence representation and regulation of Viagra in the Swedish market Glocal Pharma offers analyses of commercial material medical discourses and legal documents to show how a Swedish Viagra consuming subject has been constructed in relation to the drug and how Viagra is imagined in relation to the Swedish man Engaging with debates about pharmaceuticalization the authors consider the ways in which new identities are created around drugs the redefinition of health problems as sites of pharmaceutical treatment and changes in practices of governance to reflect the entrance of pharmaceuticals to the market With attention to local contexts it reveals elements in the nexus of pharmaceuticalization that are receptive to cultural elements as new products become embedded in local markets An empirically informed study of the ways in which the presence of a drug can alter the concept of a disease and its treatment understandings of who suffers from it and how to cure it both locally and internationally this book will appeal to scholars of sociology and science and technology studies with interests in globalization pharmaceuticals gender and the sociology of medicine

The New Production of Users Sampsa Hyysalo, Torben Elgaard Jensen, Nelly Oudshoorn, 2016-04-20

Behind the steady stream of new products technologies systems and services in our modern societies there is prolonged and complicated battle around the role of users How should designers get to know the users interests and needs Who should speak for the users How may designers collaborate with users and in what ways may users take innovation into their own hands The New Production of Users offers a rare overview of these issues It traces the history of designer user relations from the era of mass production to the present days Its focus lies in elaborating the currently emerging strategies and approaches to user involvement in business and citizen contexts It analyses the challenges in the practical collaborations between designers and users and it investigates a number of cases where groups of users collectively took charge of innovation In addition to a number of new case studies the book provides a thorough account of theories of user involvement as well as and offers further developments to these theories As a part of this the book relates to the wide spectrum of fields currently associated with user involvement such as user centered design participatory design user innovation open source software cocreation and peer production Exploring the nexus between users and designers between efforts to democratize innovation and to mobilize users for commercial purposes this multi disciplinary book will be of great interest to academics policy makers and practitioners in fields such as Innovation Studies Innovation Policy Science and Technology Studies Cultural Studies Consumption studies Marketing e commerce Media Studies as well as Design research

Healthcare and Big Data Mary F.E. Ebeling, 2016-09-27 This highly original book is an ethnographic noir of how Big Data profits from patient private

health information The book follows personal health data as it is collected from inside healthcare and beyond to create patient consumer profiles that are sold to marketers Primarily told through a first person noir narrative Ebeling as a sociologist hard boiled detective investigates Big Data and the trade in private health information by examining the information networks that patient data traverses The noir narrative reveals the processes that the data broker industry uses to create data commodities data phantoms or the marketing profiles of patients that are bought by advertisers to directly market to consumers Healthcare and Big Data considers the implications these data phantoms have for patient privacy as well as the very real harm that they can cause **Anthropologies of Cancer in Transnational Worlds** Holly F.

Mathews, Nancy J. Burke, Eirini Kampriani, 2015-06-26 Cancer is a transnational condition involving the unprecedented flow of health information technologies and people across national borders Such movement raises questions about the nature of therapeutic citizenship how and where structurally vulnerable populations obtain care and the political geography of blame associated with this disease This volume brings together cutting edge anthropological research carried out across North and South America Europe Africa and Asia representing low middle and high resource countries with a diversity of national health care systems Contributors ethnographically map the varied nature of cancer experiences and articulate the multiplicity of meanings that survivorship risk charity and care entail They explore institutional frameworks shaping local responses to cancer and underlying political forces and structural variables Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license https://uswest2.amazonaws.com/tandfbis-rt/files/docs/OpenAccessChapters/9781138776937_oachapter3.pdf **NICE** Paul Atkinson, Sally Sheard, 2025-03-31 It may seem as if the National Institute of Health and Care Excellence NICE has always been part of the UK's health and social care landscape But this fascinating book charts the evolution of NICE from its origins 25 years ago as well as how this development illustrates many of the key themes effecting health care today In a period of rapid medical and technological advance NICE has been both a gatekeeper to ensure that health care resources are spent where they are needed most and a promoter of patient access to the best new technologies Through a detailed history the authors show how NICE's remit grew from health care to public health to social care advancing the use of evidence based policy making and health economics as it did so Playing a key role in ethical debates which often made the news NICE also realigned the relationship between patients politicians and the pharmaceutical industry Written by two of the leading scholars in the field this fascinating history also situates NICE in an international context where it is often seen as a model to follow It will be key reading for students and researchers in the fields of health and social care and health policy as well as professionals and interested general readers The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Routledge Handbook of Complementary and Alternative Medicine Nicola K. Gale, Jean V. McHale, 2015-04-10 The

provision and use of traditional complementary and alternative medicine CAM has been growing globally over the last 40 years As CAM develops alongside and sometimes integrates with conventional medicine this handbook provides the first major overview of its regulation and professionalization from social science and legal perspectives The Routledge Handbook of Complementary and Alternative Medicine draws on historical and international comparative research to provide a rigorous and thematic examination of the field It argues that many popular and policy debates are stuck in a polarized and largely asocial discourse and that interdisciplinary social science perspectives theorising diversity in the field provide a much more robust evidence base for policy and practice in the field Divided into four sections the handbook covers analytical frameworks power professions and health spaces risk and regulation perspectives for the future This important volume will interest social science and legal scholars researching complementary and alternative medicine professional identity and health care regulation as well as historians and health policymakers and regulators

The Provoked Economy Fabian Muniesa, 2014-05-16 Do things such as performance indicators valuation formulas consumer tests stock prices or financial contracts represent an external reality Or do they rather constitute in a performative fashion what they refer to The Provoked Economy tackles this question from a pragmatist angle considering economic reality as a ceaselessly provoked reality It takes the reader through a series of diverse empirical sites from public administrations to stock exchanges from investment banks to marketing facilities and business schools in order to explore what can be seen from such a demanding standpoint It demonstrates that descriptions of economic objects do actually produce economic objects and that the simulacrum of an economic act is indeed a form of realization It also shows that provoking economic reality means facing practical tests in which what ought to be economic or not is subject to elaboration and controversy This book opens paths for empirical investigation in the social sciences but also for the philosophical renewal of the critique of economic reality It will be useful for students and scholars in social theory sociology anthropology philosophy and economics

Pharmaceutical Research, Democracy and Conspiracy Edison Bicudo, 2016-04-22 Clinical trials used to be conducted overwhelmingly in the US and Europe but for a range of economic technical and ethical reasons the number of multicentre studies recruiting subjects in different regions of the World has grown exponentially New medicines are tested in vast research networks involving several countries hospitals and other medical institutions and hundreds of individual subjects In Pharmaceutical Research Democracy and Conspiracy Edison Bicudo examines the connections between global and local scales exploring how it is possible for social actors as different as global companies and patients of local hospitals to come together and establish social relationships that may last many years He also identifies the implications of these global local relationships for the financial technical and cultural structures of the participating hospitals His study draws on fieldwork conducted in five countries the UK Spain France Brazil and South Africa Shining a light on the social mediations that enable the encounter between these rationalities the author concludes that this has the practical effect of subjecting countries hosting trials to institutional

engineering Hospitals and research agencies create new sometimes surprising institutional arrangements to cope with international research projects which change relations between physicians and patients as they acquire new roles as clinical investigators and research subjects Frequently such shifts deviate the institutional structures of medical institutions away from democratic and towards conspiratorial schemes The book reviews the concept of mediation in sociological thought proposes further developments in Habermas theory of communicative action and offers some political reflection about the role of institutions in contemporary democracies

The Value of Transnational Medical Research Ann H. Kelly, P. Wenzel Geissler, 2013-09-13 What is the value of medical research With contributions from anthropologists sociologists and activists this approach brings into focus the forms of value social epistemic and economic that are involved in medical research practices and how these values intersect with everyday living Though their work covers wide empirical ground from HIV trials in Kenya and drug donation programs in Tanzania to industry academic collaborations in the British National Health Service the authors share a commitment to understanding the practices of medical research as embedded in both local social worlds and global markets Their collective concern is to rethink the conventional ethical demarcations between paid and unpaid research services in light of the social and material organisation of medical research practices Rather than warn against economic incursions into medical knowledge and health practice or alternatively the reduction of local experience to the standards of bioethics we hope to illuminate the array of practices knowledges and techniques through which the value of medical research is brought into being This book was originally published as a special issue of Journal of Cultural Economy

[Sexualizing Cancer](#) Laura Mamo, 2023-12-20 Starting in 2005 people in the US and Europe were inundated with media coverage announcing the between cervical cancer and the sexually transmitted virus HPV Within a year product ads promoted a vaccine targeting cancer's viral cause and girls and women were enrolled as early consumers of this new cancer vaccine The knowledge of HPV's links to other cancers notably anal and oral soon followed which identified new at risk populations and ignited a variety of gendered and sexual issues related to cancer prevention Sexualizing Cancer is the first book dedicated to the emergence and proliferation of the HPV vaccine It shows how the late twentieth century scientific breakthrough that identified the human papilloma virus as having a causative role in the onset of human cancer ignited sexual politics struggles for inclusion new risk identities and ultimately a new regime of cancer prevention Mamo reveals how gender and other equity arguments from within scientific medical and advocate communities shaped vaccine guidelines clinical trial funding research practices and clinical programs with consequences that reverberate today This is a must read history of medical expansion from a woman's disease to a set of cancers that affect all genders and of lingering sexualization with specific gendered racialized and other contours along the way Selling points Reveals how cervical cancer became a highly visible cancer while other HPV related cancers were downplayed Makes clear how the places and people that could most benefit from a vaccine were the ones farthest from receiving its benefits Up to date
