The Oxford Handbook of Mystical Theology Edward Howells,Mark A. McIntosh,2020-02-25 The Oxford Handbook of Mystical Theology provides a guide to the mystical element of Christianity as a theological phenomenon It differs not only from psychological and anthropological studies of mysticism but from other theological studies such as more practical or pastorally oriented works that examine the patterns of spiritual progress and offer counsel for deeper understanding and spiritual development It also differs from more explicitly historical studies tracing the theological and philosophical contexts and ideas of various key figures and schools as well as from literary studies of the linguistic tropes and expressive forms in mystical texts None of these perspectives is absent but the method here is more deliberately theological working from within the fundamental interests of Christian mystical writers to the articulation of those interests in distinctively theological forms

in order finally to permit a critical theological engagement with them for today Divided into four parts the first section introduces the approach to mystical theology and offers a historical overview Part two attends to the concrete context of sources and practices of mystical theology Part three moves to the fundamental conceptualities of mystical thought The final section ends with the central contributions of mystical teaching to theology and metaphysics Students and scholars with a variety of interests will find different pathways through the Handbook

Women Choosing Silence Alison Woolley, 2019-01-22 Silence is long established as a spiritual discipline amongst people of faith However its examination tends to focus on depictions within texts emerging from religious life and the development of its practices Latterly feminist theologians have also highlighted the silencing of women within Christian history Consequently silence is often portrayed as a solitary discipline based in norms of male monastic experience or a tool of women's subjugation In contrast this book investigates chosen practices of silence in the lives of Christian women today evidencing its potential for enabling profound relationality and empowerment within their spiritual journeys Opening with an exploration of Christianity's reclamation of practices of silence in the twentieth century this contemporary ethnographic study engages with wider academic conversations about silence Its substantive theological and empirical exploration of women's practices of silence demonstrates that for some silence based prayer is a valued space for encounter and transformation in relationships with God with themselves and with others Utilising a methodology that proposes focusing on silence throughout the qualitative research process this study also illustrates a new model for depicting relational change Finally the book urges practical and feminist theologians to re-examine silence's potential for facilitating the development of more authentic and responsible relationality within people's lives This is a unique study that provides new perspectives on

practices of silence within Christianity particularly amongst women It will therefore be of significant interest to academics practitioners and students in theology and religious studies with a focus on contemporary religion spirituality feminism gender and research methods
