Contemporary Issues in Digital Communication, Media, and Culture Karpouzis, Kostas, Skarpelos, Ioannis, 2025-09-24 In an age where technology shapes human interaction contemporary issues in digital communication media and culture become complex From the rise of social media algorithms influencing public opinion to concerns about

data privacy misinformation and digital surveillance today's digital landscape presents both new opportunities and critical challenges. These issues affect how individuals connect, how cultures evolve, and how societies function globally. Understanding and analyzing these dynamics may help navigate the ethical, social, and political implications of life in a digital world.

Contemporary Issues in Digital Communication: Media and Culture explores the intersection of computer science and social sciences, examining how computational methods analyze, interpret, and shape the disciplines of communication, media, and culture. It examines the theoretical foundations, methodologies, and applications of computational techniques in understanding and influencing human communication and cultural phenomena. This book covers topics such as social media, artificial intelligence, and information technology and is a useful resource for media and communications professionals, engineers, sociologists, academicians, researchers, and scientists.

Broadcast News and Writing Stylebook by Bob Papper and Janet Kolodzy, 2024-11-14, is the go-to resource for writing broadcast news, offering a concise introduction to writing engaging stories for television, radio, podcasts, and online media. Covering the nuances of reporting, grammar, style, and usage, readers will learn how to craft stories on government, crime, weather, education, health, sports, and more. This eighth edition is updated to include new sections on industry challenges and opportunities from artificial intelligence, deepfakes, and streaming. Fully updated examples, exercises, and glossary. An expanded focus on ethics with ethical issues discussed in virtually every chapter. Drawing on over a quarter of a century of broadcast news and industry research experience, authors Papper and Kolodzy once again ensure this vital text contains all the information necessary for being a successful news writer today. Whether you're a journalism student or a working broadcast professional, *Broadcast News and Writing Stylebook* is a definitive reference for your bookshelf. This book also features an accompanying Instructor Manual found at www.routledge.com 9781032519845.

Digital Populism and the Use of Neo-Propaganda and Fake News by Vieira, Andreia Teles, Joaquim, Ana Filipa, Duarte, Alexandre, 2025-05-07, As populism grows across global democracies, the integration of new technologies has significantly amplified the use of propaganda techniques and the spread of fake news. Tools like social media and artificial intelligence (AI) make digital technologies privileged vehicles for populist communication. Due to the use of fallacies, propaganda is confused with fake news, though these techniques are broader and based on political strategies to manipulate public opinion. With the advent of new technologies and the ever-increasing incorporation of AI into social life, political parties are facing a form of two-way communication without intermediaries, meaning they can directly reach and influence the public with reduced costs. Understanding the social impact of digital propaganda may help foster political literacy among civil society.

Digital Populism and the Use of Neo-Propaganda and Fake News explores various populist parties aiming to identify and understand their use of propaganda and fake news. It provides a comprehensive global vision of populism in different nations and examines the communication strategies based on propaganda and disinformation. Covering topics such as social media, computational propaganda, and political rhetoric, this

book is an excellent resource for political analysts journalists sociologists government officials policymakers researchers academicians and more

Total Marketing: The business of integrating consumers, employees, and company networks Mara Cassinari, Frank Pagano, 2025-10-14 Exponential technologies are giving superpowers to humans and data unlocking tremendous value with major efficiencies to be gained while running the planet In today's digital age to use the marketing jargon creating connections that are seamless efficient and technology driven is not just an advantage it's a necessity for businesses of all sizes public and private Welcome to the world of Total Marketing namely a comprehensive and holistic approach that brings together all stakeholders into a cohesive and interconnected ecosystem powered by tech A new marketing needs experiences that are heavily imbued with technology To use Gartner's terminology it needs a Total Experience as its foundation Total Marketing is created by an ever changing layer of exponential technologies among which AI of course and blockchains and by the need for a culture change across the whole web of consumers employees and suppliers The truth is we are all linked and our goal should be to increase social capital for everyone and reach service excellence with minimum impact on the outer community and zero noise and negative externalities Total Marketing means that our input whoever we are in the food chain is captured via a hybrid net of phygital interfaces and devices and processed instantly and intelligently with the final output being the result of the perfect allocation and use of available resources served to anyone in a fair and ultra personalized fashion measured exactly against their needs and desires present and future There will be no other way to do business in the future

Regulatory Challenges of AI Governance in the Era of ChatGPT Toriqul Islam, 2024-12-06 The increasing integration of artificial intelligence AI and particularly of large language models LLMs like ChatGPT into human interactions raises significant ethical and social concerns across a broad spectrum of human activity Therefore it is important to use AI responsibly and ethically and to be critical of the information it generates This book the first comprehensive work to provide a structured framework for AI governance focuses specifically on the regulatory challenges of LLMs like ChatGPT It presents an extensive framework for understanding AI regulation addressing its societal and ethical impacts and exploring potential policy directions Through 11 meticulously researched chapters the book examines AI's historical development industry applications socio ethical concerns and legal challenges Advocating for a human centric risk based regulatory approach emphasising transparency public participation and ongoing monitoring the book covers such aspects of AI and its governance as the following a comprehensive overview of the history and mechanics of AI widespread public misconceptions surrounding ChatGPT ethical considerations e.g. misinformation accountability and transparency societal implications e.g. job displacement critical thinking and malicious use privacy concerns intellectual property challenges healthcare application dilemmas interplay between LLMs and finance and cross border regulatory challenges Throughout the author identifies significant gaps in existing legal frameworks and explores potential policy directions to bridge these gaps The book offers invaluable insights and recommendations for policymakers legal experts

academics students technologists and anyone interested in AI governance It underscores the need for a collaborative effort and meaningful dialogue among industry leaders academia and civil society worldwide to promote responsible and ethical development and use of AI for the benefit of humanity
