Throughout the book appropriate command prompts are employed to identify the lab system and user to run a command. Each command and task presented in the book was actually performed and tested on lab systems. Followed by the lab environment setup in Part One, the book presents the essentials of Linux incl interaction with Linux basic commands, file management, permissions, ownership, linking, searching, special permissions, editing, filter programs, regex, shell features, and process handling. Subsequent topics focus on system administration incl shared libraries, Debian and RPM package management, system boot and initialization, hardware management, kernel modules, storage partitioning, file system creation and repairs, quota handling, and swap space administration. This brings Part One to an end and you should be able to take the quiz in Appendix A to test your readiness for the LX0 103 101 400 exam. Part Two covers all the objectives for the LX0 104 102 400 exam. It covers shell scripts with a presentation and line by line analysis of several scripts. Building a simple SQL database and performing queries comes next. A detailed comprehension of local authentication files, user creation, password aging, and shell startup files follows. The book covers networking concepts, reference models, and terms that accompany exercises on interface configuration, hostname change, and route management. A discussion of network testing and debugging tools is furnished and their usage is demonstrated, followed by topics on internationalization, localization, time synchronization, name resolution, X Window display, desktop managers, accessibility options, printer and print queue administration, task scheduling, system logging, system and service access controls, emailing, and email aliasing, searching for special files, and so on. This brings Part Two to an end and you should be able to take the quiz in Appendix C to test your readiness for the LX0 104 102 400 exam. Highlights: 100% coverage of ALL official exam objectives, version 4.0. Enumerated and descriptive knowledge areas under exam objectives to assist in identifying and locating them. A summarized and convenient view showing exam objectives, chapters they are discussed in, associated weights, the number of questions to expect on the real exam, and other useful information. Separate section on each exam: 15 chapters in total, 8 for LX0 103 101 400 and 7 for LX0 104 102 400. Detailed guidance on building lab environment. 49 tested hands-on exercises with explanation. Numerous tested practical examples for clarity and understanding. Chapter end one sentence review of key topics. 790 single response, multiple response, and fill in the blank practice questions, answers to test your knowledge of the material and exam readiness. Equally good for self study and in class training.

Unveiling Semiotic Codes of Fake News and Misinformation Tatiana Iskanderova, 2024-02-26. This book offers a comprehensive exploration of the widespread issue of fake news and misinformation. Using real life examples and semiotic theory, the author demonstrates how language, images, and symbols are being utilized in media production and distribution with the intention of altering the perception of individuals and shaping their beliefs. The book also addresses how social and cultural factors influence the spread of information and emphasizes the importance of understanding the context in which information is being received and shared. This book is a must read for anyone seeking to understand the impact of fake news and misinformation on society, especially academics and researchers.

journalists policymakers and media professionals at all levels The author provides contemporary theories and practical strategies to navigate the complex and ever changing media landscape
