Catherine Barnett

3D Character Animator

Hard-working animator with 3+ years of professional experience in 3D modeling, looking for a place to thrive at Cool Story Game Studios. Deep knowledge of 3D, texturing, skinning, and rendering. Successful background in creating action-packed scenes through rigging and skeletal animation. Proficient user of Blender, Adobe After Effects, Photoshop, and Unreal Engine.

WORK EXPERIENCE

3D Character Animator Iceberg Games Inc.

04/2023 - Present

Toronto, Canada

- Worked on a high-pressure project, delivering complex 3D character animation sequences, contributing to a 35% increase in player immersion as measured by game tester surveys.
- Collaborated with game designers and writers to match CG characters' animation to their environment and personality.
- Depicted complicated concepts through high-end 3D animations in Blender for a AAA game which sold over 5 million copies within the first six months of release.
- Successfully trained 3 junior animators in specialized 3D software for character animation within one month.
- Consistently met strict project deadlines, working on a total of 2 highly-anticipated games with over 200 hours of gameplay.

Animator and Designer Laughtrack Studios

01/2021 - 03/2023

New York, USA

- Collaborated with the marketing department to design materials for promotional stages of an indie game's development.
- Designed characters and environments in collaboration with concept artists and storyboard writers to ensure seamless delivery of final animations.
- Spearheaded the implementation of mixed 2D and 3D animation techniques to create visually stunning animations.
- Modeled characters in ZBrush for the 3D re-release of a 2D game, completing the projects 3 weeks ahead of schedule.

Statistics And Experimental Design

For Psychologists: A Model Comparison Approach Rory Allen,2017-08-28 This is the first textbook for psychologists which combines the model comparison method in statistics with a hands on guide to computer based analysis and clear explanations of the links between models hypotheses and experimental designs Statistics is often seen as a set of cookbook recipes which must be learned by heart Model comparison by contrast provides a mental roadmap that not only gives a deeper level of understanding but can be used as a general procedure to tackle those problems which can be solved using orthodox statistical methods Statistics and Experimental Design for Psychologists focusses on the role of Occam s principle and explains significance testing as a means by which the null and experimental hypotheses are compared using the twin criteria of parsimony and accuracy This approach is backed up with a strong visual element including for the first time a clear illustration of what the F ratio actually does and why it is so ubiquitous in statistical testing The book covers the main statistical methods up to multifactorial and repeated measures ANOVA and the basic experimental designs associated with them The associated online supplementary material extends this coverage to multiple regression exploratory factor analysis power calculations and other more advanced topics and provides screencasts demonstrating the use of programs on a standard statistical package SPSS Of particular value to third year undergraduate as well as graduate students this book will also have a broad appeal to anyone wanting a deeper understanding of the scientific method

Sensorial and analytical profiling of orange juice and apple juice Sabrina Kotter-Seel,2018-01-26 In the modern product development process newly developed products have to be tested in terms of their analytical and sensorial stability throughout the whole shelf life A real time storage at ambient conditions until reaching the best before date is not efficient considering the required time and in commercial resources Therefore accelerated shelf life testing ASLT has become a central step in the usual product development procedure The objective of this work was the development and establishment of prediction models regarding the stability and shelf life of orange juice and apple juice To this end the juices were stored at different temperatures and were investigated regarding their sensory profiles by quantitative descriptive analysis QDA and their compositions of volatiles by untargeted profiling via GC MS The final prediction models were derived by combination of the sensory and volatiles related data sets in a holistic prediction approach

The Language of New Media Design Radan Martinec,Theo van Leeuwen,2020-10-28 The Language of New Media Design is an innovative new textbook presenting methods on the design and analysis of a variety of non linear texts from websites to CD Roms Integrating theory and practice the book explores a range of models for analyzing and constructing multimedia products For each model the authors outline the theoretical background and demonstrate usage from students coursework commonly available websites and other multimedia products Assuming no prior knowledge the book adopts an accessible approach to the subject which has been

trialled and tested on MA students at the London College of Communication Written by experienced authors this textbook will be an invaluable resource for students and teachers of new media design information technology linguistics and semiotics
