Medical Ethics and Law Dominic Wilkinson, Julian Savulescu, Tony Hope, Judith Hendrick, BA, LL.M, 2008-03-06 This is a short textbook of ethics and law aimed primarily at medical students The book is in two sections The first considers general aspects of ethics in the context of medicine the second section covers the topics identified in the consensus agreement The content of medical law is not intended to be comprehensive and relates very much to the ethical issues The law will be updated throughout including consent in light of Mental Capacity Act mental health law in light of Mental Health Act end of life depending on outcome of Burke case and the passage of the Joffe Bill assisted reproduction in light of expected changes in HFEA New guidelines to be added the guidelines and processes around medical research are under review and likely to develop and change GMC guidelines are under continual revision the Burke case in particular may have direct impact but it is also likely that the confidentiality guidelines will undergo revision particularly in view of the increasing importance of genetic data The new legal aspects outlined above will require some changes to the ethical analysis the ethical issues of new technology will be included cloning transgenesis and chimera i.e forming organisms from more than one species and stem cells resource allocation ethics is moving on to examining a wider range of issues than covered in the first edition and this will be discussed the whole area of mental disorder and capacity to consent is an active area of ethical research and the second edition would cover some of this new work

The Philosophy and Practice of Medicine and Bioethics Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned

themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one's thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc
