Medicine And Care Of The Dying A Modern History:

Medicine and Care of the Dying Milton James Lewis, 2007 This book is for palliative care practitioners and all health care professionals with an interest in end of life care **The Dying Experience** Samuel H. LiPuma, Joseph P.

DeMarco, 2019-03-27 This vitally important book attempts to move beyond the current death denying culture The use of euphemistic and defiant phrases when dealing with terminal disease such as She lost her battle with cancer was more appropriate when medical doctors could do little to prolong life But treatments and technologies have significantly changed Now life prolonging interventions have outpaced our willingness to use medical intervention to secure patient control over death and dying We now face a new question When is it morally appropriate for medical intervention to hasten the dying process LiPuma and DeMarco answer by endorsing expanded options for dying patients Unwanted aggressive treatment regimens and protocols which reject hastening death should be replaced by a patient's moral right in carefully defined circumstances to hasten death by means of medical intervention Expanded options range from patient directed continuous sedation without hydration to physician assisted suicide for those with progressive degenerative disorders such as Alzheimer's The authors overriding goal is to humanize the dying process by expanding patient centered autonomous control

Narrative Medicine in Hospice Care Tara Flanagan, 2019-12-13 Narrative medicine an interdisciplinary field that brings together the studies of literature and medicine offers both a way of understanding patient identity and a method for developing a clinician's responsiveness to patients While recognizing the value of narrative medicine in clinical encounters including the ethical aspects of patient discourse Tara Flanagan examines the limits of narrative practices for patients with cognitive and verbal deficits In *Narrative Medicine in Hospice Care Identity Practice and Ethics through the Lens of Paul Ricoeur* Flanagan contends that the models of selfhood and care found in the work of Ricoeur can offer a framework for clinicians and caregivers regardless of the verbal and cognitive capabilities of a patient at the end of life In particular Ricoeur's concept of patient identity connects with the narrative method of life review in hospice and offers an opportunity to address the religious and spiritual dimensions of the patient experience

Mahar, 2023-02-07 I have quite a bit of understanding of white man's ways but it is difficult for me to understand this one A Senate committee investigation of Australia's Northern Territory Rights of the Terminally Ill Act 1995 the first legislation in the world which allowed doctors to actively assist patients to die found that for the vast majority of Indigenous Territorians the idea that a physician or anyone else should help end a dying suffering person's life was so foreign that in some instances it proved almost impossible to translate This book explores how such a death became a thinkable even desirable way to die for so many others in Western cultures Though euthanasia meaning good death derives from ancient Greece for the Greeks this was a matter of Fate or a gift the gods bestowed on the virtuous or simply lucky Caring for the dying was not part of the doctor's remit For the Victorians a good death meant one blessed by God and widespread belief in a divine design and the value of suffering created resistance to new forms of pain relief And today while most in the Western world cleave to the modern medical view that pain is an aberration to be where possible eliminated complex cultural ethical and practical questions regarding what makes for a good death remain As Caitlin Mahar memorably shows in *The Good Death Through Time* understanding the radical historical shift in Western attitudes to managing dying and suffering helps us better grasp the stakes in today's contestations over what it means to die well *The ^AVirtues of Vulnerability* Sara

Rushing, 2020-11-20 This book treats contemporary healthcare as a site of politics a place of embodiment and vulnerability
