

The background of the cover is a photograph of a museum exhibit. In the foreground, several glass bottles with labels are visible. The labels on the bottles include 'STEUR', 'JOSEPH BANKS', 'FRANCIS CRICK', and 'ROBERT KOCH'. Behind the bottles, there are animal skeletons, including a large one that appears to be a bird or a small mammal. The lighting is dramatic, highlighting the specimens.

Medicine And The Politics Of Knowledge:

Medicine and the Politics of Knowledge Susan L. Levine, 2012 *Medicine and the Politics of Knowledge* situates South Africa including its history of stances and political formations around HIV AIDS in the broader context of questions relating to science medicine human experimentation and structural violence all of which shape the cases in the book Putting South Africa in the context of other cases of contention and contestation about science and medicine in India Latin America and China helps us to understand the particular history of the South African case itself Conceived in response to the urgency of bioethical debates in medical anthropology this ethnographic collection touches the borders of anthropology philosophy and public health Publisher's website

The Politics of Knowledge Lily M. Hoffman, 1989-06-01 In this book the author examines the question of the compatibility of politics policy making and professional work Based on nineteen case studies of organizations Hoffman looks at what happened as doctors and planners set out to redistribute services to minorities and the poor between 1960 and 1980

Mary Putnam Jacobi and the Politics of Medicine in Nineteenth-Century America Carla Bittel, 2012-06-01 In the late nineteenth century as Americans debated the woman question a battle over the meaning of biology arose in the medical profession Some medical men claimed that women were naturally weak that education would make them physically ill and that women physicians endangered the profession Mary Putnam Jacobi 1842 1906 a physician from New York worked to prove them wrong and argued that social restrictions not biology threatened female health Mary Putnam Jacobi and the Politics of Medicine in Nineteenth Century America is the first full length biography of Mary Putnam Jacobi the most significant woman physician of her era and an outspoken advocate for women's rights Jacobi rose to national prominence in the 1870s and went on to practice medicine teach and conduct research for over three decades She campaigned for co education professional opportunities labor reform and suffrage the most important women's rights issues of her day Downplaying gender differences she used the laboratory to prove that women were biologically capable of working learning and voting Science she believed held the key to promoting and producing gender equality Carla Bittel's biography of Jacobi offers a piercing view of the role of science in nineteenth century women's rights movements and provides historical perspective on continuing debates about gender and science today

The Politics of Vaccination Deborah Brunton, 2008 A detailed examination of the political forces and events that shaped smallpox vaccination policy in England Wales Ireland and Scotland during the nineteenth century

Political Education Robert Brownhill, Patricia Smart, 2025-06-02 A debate has been in existence as to whether political education or indeed political argument of any kind should be kept out of the classroom There are those who argue that political education is synonymous with indoctrination and others who suggest that education is by its nature political For those who agree that there should be a distinct political aspect of the curriculum which instils political knowledge and awareness there is of course the question of where the emphasis should be placed How is it possible to achieve any kind of balance First published in 1989 Political Education analyses the debate about the

introduction of courses in political education to secondary tertiary and adult education as well as to youth work It also examines the introduction of an element of political education to specific subjects It puts forward an argument for political education and discusses what it should consist of and how it should be undertaken This book will be of interest to students and researchers of education

Medical Humanities and Medical Education Alan Bleakley, 2015-03-02 The field of the medical humanities is developing rapidly however there has also been parallel concern from sceptics that the value of medical humanities educational interventions should be open to scrutiny and evidence Just what is the impact of medical humanities provision upon the education of medical students In an era of limited resources is such provision worth the investment This innovative text addresses these pressing questions describes the contemporary territory comprising the medical humanities in medical education and explains how this field may be developed as a key medical education component for the future Bleakley a driving force of the international movement to establish the medical humanities as a core and integrated provision in the medical curriculum proposes a model that requires collaboration between patients artists humanities scholars doctors and other health professionals in developing medical students sensibility clinical acumen based on close noticing and sensitivity ethical professional and humane practice In particular this text focuses upon how medical humanities input into the curriculum can help to shape the identities of medical students as future doctors who are humane caring expressive and creative whose work will be technically sound but considerably enhanced by their abilities to communicate well with patients and colleagues to empathise to be adaptive and innovative and to act as medical citizens in shaping a future medical culture as a model democracy where social justice is a key aspect of medicine Making sense of the new wave of medical humanities in medical education scholarship that calls for a critical medical humanities Medical Humanities and Medical Education incorporates a range of case studies and illustrative and practical examples to aid integrating medical humanities into the medical curriculum It will be important reading for medical educators and others working with the medical education community and all those interested in the medical humanities

schools and places of worship reflect changing attitudes towards healing They explore the impact of medical advances on the design of hospitals across various times and geographies and examine the historic construction processes and the stylistic connections between places of care and other building types and their development in urban context Deploying new methodological interdisciplinary and comparative approaches to the analysis of healthcare facilities Health and Architecture demonstrates how the spaces of healthcare themselves offer some of the most powerful and practical articulations of therapy
