Valiente,2017-09-25 This is the proceedings of the XVI International Congress of Graphic Design in Architecture EGA 2016 held in Alcal de Henares Spain in June 2016 About 200 professionals and researchers from 18 different countries attended the Congress This book will be of interest to researchers in the field of architecture and Engineering Topics discussed are Innovations in Architecture graphic design and architecture history and heritage among others **Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950** Eszter Gantner,Heidi Hein-Kircher,Oliver Hochadel,2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative This applied urban knowledge was generated through interurban networks and multi directional exchanges Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery This volume will appeal to scholars from a large number of disciplines including urban historians historians of Eastern and Southern Europe historians of science and medicine and scholars interested in transnational connections *Selbstentwurf* Dietrich Boschung,Julian Jachmann,2018-05-18 Der Band vereint Beitr ge von Architekturhistorikern und praktizierenden Architekten zum Thema des Architektenhauses das durch eine kritische Rezeption aktueller Ans tze aus der kunsthistorischen Selbstportr t Forschung neu konturiert wird In dem vom Architekten f r sich selbst entworfenen Wohnhaus verdichten sich in einzigartiger Komplexit t Aspekte des k nstlerischen Schaffens eines oft ostentativen Selbstbezuges und der Verortung in kulturellen und sozialen Gef gen Die seit dem 15 Jahrhundert berlieferten Entw rfe besitzen nicht selten einen experimentellen Charakter sie dienten ebenso als konomisches Instrument wie als Manifest und utopischer Ausblick Die paradoxe Vielfalt der Interessen wird in diesem Band unter den pointierten Begrifflichkeiten der j ngeren Forschungen zum Selbstportr t neu beleuchtet indem nach der Rolle eines derartigen Selbstentwurfes zur Selbstvergewisserung gefragt wird **The Routledge Companion to Contemporary Architectural History** Duanfang Lu,2023-07-31 The Routledge Companion to Contemporary Architectural History offers a comprehensive and up to date knowledge report on recent developments in architectural production and research Divided into three parts Practices Interrogations and Innovations this book charts diversity criticality and creativity in architectural interventions to meet challenges and enact changes in different parts of the world through featured exemplars and fresh theoretical orientations The collection features 29 chapters written by leading architectural scholars and highlights the reciprocity

between the historical and the contemporary research and practice and disciplinary and professional knowledge Providing an essential map for navigating the complex currents of contemporary architecture the Companion will interest students academics and practitioners who wish to bolster their understanding of built environments

Saving South Beach M. Barron Stofik, 2012-09-23 In Saving South Beach historic preservation clashes with development as each side vies for control of South Beach A spectrum of characters are present from Barbara Baer Capitman the ailing middle aged widow who became an evangelist for the Miami Beach Art Deco district to Abe Resnick the millionaire Holocaust survivor determined to stop her From pioneers to volunteers from Jewish retirees to Cuban exiles from residents and business owners to developers and city leaders each adds another piece to the puzzle another view of the intense conflict that ensued Although a number of the area's iconic buildings were demolished the Miami Design Preservation League succeeded in entering almost half of the neighborhood into the National Register of Historic Places kicking off a revitalization effort that spread throughout South Beach Preservationist M Barron Stofik lived in Miami during this turmoil ridden period and through hundreds of interviews and extensive investigation weaves together dramatic themes of civic heroism preservation and cultural change in the passionate human story behind the pastel facades and neon lights

Region Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them

Periods of World History Charles A. Truxillo, 2008 *Periods of World History a Latin American Perspective* is the first serious attempt to write a world history narrative in which Latin America receives serious consideration The chronology of the work covers the normative period of world history to date 1800 B C to 1800 A D During this time differentiation of world societies was at its height The six civilized core areas of the ecumene interacted but were not moving toward uniformity as was characteristic of the first phase of world history Theocratic civilizations 3500 1500 B C Over the last two centuries global societies have also tended to coalesce because of westernization industrialism nationalism ideology and the media During the normative phase

of human history Latin America moved from being a periphery of Afro Eurasia to the status of becoming the economic crucible of Spain's vast Catholic monarchy which was the ecumene's first global power 1492-1648 A.D. Latin America was again reduced to peripheral status. Periods of World History explains these processes in the larger context of a truly global historical narrative and as such makes an extraordinary contribution to understanding human social development. Charles Truxillo is a professor of Chicano Studies at the University of New Mexico in Albuquerque. He received his Ph.D. in Latin American history at UNM and has published two other books: *History of Islam* and *By the Sword and the Cross*. Dr. Truxillo is dedicated to teaching Chicano Studies in the context of Latin America and world history.

Structural Analysis of Historical Constructions Rafael Aguilar, Daniel Torrealva, Susana Moreira, Miguel A. Pando, Luis F. Ramos, 2018-08-18. This volume contains the proceedings of the 11th International Conference on Structural Analysis of Historical Constructions (SAHC) that was held in Cusco, Peru, in 2018. It disseminates recent advances in the areas related to the structural analysis of historical and archaeological constructions. The challenges faced in this field show that accuracy and robustness of results rely heavily on an interdisciplinary approach where different areas of expertise from managers, practitioners, and scientists work together. Bearing this in mind, SAHC 2018 stimulated discussion on the new knowledge developed in the different disciplines involved in analysis, conservation, retrofit, and management of existing constructions. This book is organized according to the following topics: assessment and intervention of archaeological heritage; history of construction and building technology; advances in inspection and NDT; innovations in field and laboratory testing applied to historical construction and heritage; new technologies and techniques; risk and vulnerability assessments of heritage for multiple types of hazards; repair, strengthening, and retrofit of historical structures; numerical modeling and structural analysis; structural health monitoring; durability and sustainability; management and conservation strategies for heritage structures and interdisciplinary projects; and case studies. This volume holds particular interest for all the community interested in the challenging task of preserving existing constructions, enable great opportunities, and also uncover new challenges in the field of structural analysis of historical and archaeological constructions.

A Territory in Conflict Fatima Abreek-Zubiedat, 2025-04-08. *A Territory in Conflict* explores Israeli and Palestinian projects of modernization and development in the Gaza Strip from the outset of Israel's military occupation in 1967 to the Oslo Accords of 1993. Rather than reduce the Gaza Strip to an arena of war and violence, Fatima Abreek-Zubiedat resurrects the urban and architectural history of Gaza's cities and the varied perspectives and identities of the people who shaped them. Through a close examination of planning activities in occupied Palestinian territory focusing on development, settlement, and security, her book highlights the collision between Israeli occupation, Palestinian nationalism, and regional peace processes; politics of class and citizenship; contestation between camps and cities; and the tensions inherent in Israeli development policies designed to establish lasting control over the territory's demographics and resources. Abreek-Zubiedat probes the power of architecture in conflict zones, illustrating the agency of Gaza's cultural elite, its mayors,

architects and engineers At the same time she draws attention to alternative voices Gaza s local inhabitants and refugees illuminating the conflicts complexities and contradictions of settler colonialism in the Middle East Her innovative approach to urbanization resettlement and rehabilitation in the Gaza Strip offers a groundbreaking account of the Israel Palestine conflict that goes beyond the limited framework of colonizer colonized binary restoring Gaza s cities in the public eye and giving voice to the people who inhabit them Cuban Modernism Victor Deupi, Jean-Francois Lejeune, 2021-02-08 In the 20th century modern architecture thrived in Cuba and a wealth of buildings was realized prior to the revolution 1959 and in its wake The designs comprise luxurious nightclubs and stylish hotels sports facilities elegant private homes and apartment complexes Drawing on the vernacular their architects defined a way to be modern and Cuban at the same time creating an architecture oscillating between tradition and avantgarde Audacious concrete shells curving ramps elegant brises soleils and a fluidity of interior and exterior spaces are characteristic of an airy often colorful architecture well suited to life in the tropics New photographs and drawings were specially prepared for this publication A biographical survey portraits the 40 most important Cuban architects of the era *Concrete and Culture* Adrian Forty, 2013-02-15 Concrete has been used in arches vaults and domes dating as far back as the Roman Empire Today it is everywhere in our roads bridges sidewalks walls and architecture For each person on the planet nearly three tons of concrete are produced every year Used almost universally in modern construction concrete has become a polarizing material that provokes intense loathing in some and fervent passion in others Focusing on concrete s effects on culture rather than its technical properties *Concrete and Culture* examines the ways concrete has changed our understanding of nature of time and even of material Adrian Forty concentrates not only on architects responses to concrete but also takes into account the role concrete has played in politics literature cinema labor relations and arguments about sustainability Covering Europe North and South America and the Far East Forty examines the degree that concrete has been responsible for modernist uniformity and the debates engendered by it The first book to reflect on the global consequences of concrete *Concrete and Culture* offers a new way to look at our environment over the past century
