Megacities Our Global Urban Future International Year Of Planet Earth:

Megacities Frauke Kraas, Surinder Aggarwal, Martin Coy, Günter Mertins, 2013-07-12 As urbanization continues and even accelerates scientists estimate that by 2015 the world will have up to 60 megacities urban areas with more than five million inhabitants With the irresistible economic attractions of urban centers particularly in developing countries making the influx of citizens unstoppable many of humankind's coming social economic and political dramas will be played out in megacities This book shows how geographers and Earth scientists are contributing to a better understanding of megacities The contributors analyze the impact of socio economic and political activities on environmental change and vice versa and identify solutions to the worst problems They propose ways of improving the management of megacities and achieving a greater degree of sustainability in their development The goals of wise use of human and natural resources risk reduction both social and environmental and quality of life enhancement are agreed upon But as this text proves the means of achieving these ends are varied Hence chapters cover an array of topics from health management in Indian megacities to planning in New York to transport solutions for the chronically traffic choked Bangkok Authors cover the impact of climate change on megacities as well as less tangible issues such as socio political fragmentation in the urban areas of Rio de Janeiro This exploration of some of the most crucial issues that we face as a species sets out research that is of the utmost

importance with the potential to contribute substantially to global justice and peace and thereby prosperity **Megacities - Our Global Urban Future** International Union of Geological Sciences, 2005 *Engineering Geology for Tomorrow's Cities* International Association for Engineering Geology and the Environment. International Congress, 2009 Summing up knowledge and understanding of engineering geology as it applies to the urban environment at the start of the 21st century this volume demonstrates that working standards are becoming internationalised risk assessment is driving decision making geo environmental change is becoming better understood greater use of underground space is being made and IT advances are improving subsurface visualization

Megacity Mobility Culture BMW Group, 2013-01-13 What determines how cities move on The ever increasing challenges to urban mobility come in many forms and approaches to address them range from the technically ingenious to attempts to change travel behaviour Key amongst factors essential to the success of any such approach is whether the urban environment proves to be fertile ground for the desired progress Another vital determinant of success is how well individual measures to engineer the transport system interact with other developments This leads to the principal subject of Megacity Mobility Culture the basic principles that determine the paths along which cities move This book demonstrates that the concept of mobility culture provides a framework for understanding the development of urban transport which transcends the boundaries between academic disciplines Based on a discussion of the diversity of megacities worldwide it provides help in navigating the complexity of megacity mobility culture Experts from megacities around the world each take the reader on a journey to their own city and its mobility culture giving a deeper insight into the unique

evolutionary paths of mobility that these places have taken and what lies before them Whilst acknowledging the overwhelming diversity of cities worldwide the authors also identify common denominators behind the evolution of urban transport systems seven temperaments which are found in a unique mix in any given city defining the character of its mobility culture The Institute for Mobility Research is a research facility of the BMW Group It deals with future developments and challenges relating to mobility across all modes of transport with automobility being only one aspect among many Taking on an international perspective ifmo's activities focus on social science and sociopolitical economic and ecological issues but also extend to cultural questions related to the key challenges facing the future of mobility The work of the Institute is supported by an interdisciplinary board of renowned scientists and scholars and by representatives of BMW Deutsche Bahn Lufthansa MAN Siemens and The World Bank

Urban Informalities Michael Waibel, 2016-02-11 Bringing together an interdisciplinary and international group of researchers working on a wide variety of cities throughout Asia Latin America and Europe this book addresses rethinks and in some cases abandons the notions of formal and informal urbanism This collection critically interrogates both the ways in which informal and formal are put to work in the governing and politicisation of cities and their conceptual strengths and weaknesses It does so by focusing on a wide variety of topics from specific forms of housing and labour often traditionally linked to the formal informal divide to urban political negotiations cultural practices and ways of being in the city The book takes stock of and reflects on how contemporary urban informality formality relations are being produced and are might be understood and puts forward an enlarged and comprehensive understanding of urban informality

Towards Green Cities Karsten Grunewald, Junxiang Li, Gaodi Xie, Lennart Kümper-Schlake, 2017-08-05 The book aims to capture describe and convey the current significance the values and potentials of urban biodiversity and ecosystem services to scientists and professionals in the context of sustainable urban development and ongoing urbanization processes Current developments different approaches and future challenges in the competition of green spaces and urban land consumption in China and Germany are elaborated discussed and illustrated within case studies and good practice examples The strategic goal is a long term appreciation of the potentials and increased consideration of urban green spaces in city planning and development This book provides tangible recommendations for urban planners politicians and stakeholders in the fields of green infrastructure at the interface of environment and urban landscape

Drivers of Climate Change in Urban India Lutz Meyer-Ohlendorf, 2018-11-20 This study transcends the homogenizing inter national level of argumentation rich versus poor countries and instead looks at a sub national level in two respects 1 geographically it focuses on the rapidly growing megacity of Hyderabad 2 in socio economic terms the urban population is disaggregated by taking a lifestyle typology approach For the first time the lifestyle concept traditionally being used in affluent consumer societies is applied to a dynamically transforming and socially heterogeneous urban society Methodically the author includes India specific value orientations as well as social practices as markers of social structural differentiation

The study identifies differentials of lifestyle induced GHG emissions carbon footprints and underlines the ambiguity of a purely income based differentiation with regard to the levels of contribution to the climate problem

Sustainable Automotive Technologies 2012 Aleksandar Subic,Jörg Wellnitz,Martin Leary,Lucien Koopmans,2012-03-02 The book on Sustainable Automotive Technologies aims to draw special attention to the research and practice focused on new technologies and approaches capable of meeting the challenges to sustainable mobility In particular the book features incremental and radical technical advancements that are able to meet social economic and environmental targets in both local and global contexts These include original solutions to the problems of pollution and congestion vehicle and public safety sustainable vehicle design and manufacture new structures and materials new power train technologies and vehicle concepts In addition to vehicle technologies the book is also concerned with the broader systemic issues such as sustainable supply chain systems integrated logistics and telematics and end of life vehicle management It captures selected peer reviewed papers accepted for presentation at the 4th International Conference on Sustainable Automotive Technologies ICSAT2012 held at the RMIT Melbourne Australia
