Hybridity and Its Discontents Avtar Brah,Annie Coombes,2005-08-03 Hybridity and its Discontents explores the history and experience of hybridity the mixing of peoples and cultures in North and South America Latin America Britain and Ireland South Africa Asia and the Pacific The contributors trace manifestations of hybridity in debates about miscengenation and racial purity in scientific notions of genetics and race in processes of cultural translation and in ideas of nation community and belonging The contributors begin by examining the persistence of anxieties about racial contamination from nineteenth century fears of miscegenation to more recent debates about mixed race relationships and parenting Examining the lived experiences of

children of mixed parentage contributors ask why such fears still thrive in a supposedly tolerant culture The contributors go on to discuss how science while apparently neutral is part of cultural discourses which affect its constructions and classifications of gender and race The contributors examine how new cultural forms emerge from borrowings exchanges and intersections across ethnic and cultural boundaries and conclude by investigating the contemporary experience of multiculturalism in an age of contested national borders and identities **The New Colored People** Jon M.

Spencer,2000-08 Most Americans remain oblivious of a new racial phenomenon that may radically alter the political landscape of the United States In recent years dramatic increases in racial intermarriage have given birth to a generation of mixed race children whose interracially married parents refuse to allow them to be shoehorned into neat pre existing racial categories The parents through organizations they have founded or joined have lobbied aggressively for the category multiracial to be added to official racial classifications at the state and federal levels including the United States census Since a nonracial society is one of the stated goals of the multiracialists Spencer suggests that the undoing of racial classification will come not by initiating a new classification which will only give Americans the impression that mixed race people can be neatly classified but by our increased recognition that there are millions of people who simply defy classification 101

comprehensive instructor and student media package **Sunshine Vitamin & Black People** Jay Parker, Men of African American descent are at a significantly higher risk of developing prostate cancer than white men There are reasons why more black people are dying of prostate cancer Vitamin D The deficiency of it Black people need the sun more than white folks It takes less time under the sun for a white skin to manufacture all the needed vitamin D It requires more time for the dark skin to warm up and even more time to start manufacturing vitamin D Black folks tend to shy away from the sun because the sun will make them darker That is a bad strategy When you walk through a park in the summer you see sunbathers I don't know about you but these sunbathers are mostly white folks who need the sun far less than black folks Ordinarily the people that are mostly in need of sunbathing while partially naked are the black skinned people This is because dark skin need the intense sunlight the most Black skin is a marvel It is black for a reason It evolved to be black so as to be able tap into the Sun and get those properties that will give you long life full of health stronger and biologically efficient The white skin needs the Sun but not that much More than fifteen minutes in the Sun without sunscreen and they will get burns and ultimately peels Black folks need it far more and they don't get scorched in fifteen minutes even without sunscreen But some Africans and other diaspora Africans avoid the Sun Is it not ironic that while some black folks are lightening up some white folks are darkening down They call it tanning and it does not come cheap either People of African descent living in cold climate can have a natural Sun protection factor SPF of up to 13 as compared to 3-4 for whites For equatorial and other hot weather blacks it is even better This advantage for African Americans and black immigrants can also be a disadvantage It is a double edged sword for black people not living in equatorial climate You just need to have proper information with which to turn the disadvantage into an advantage Vitamin D is getting a lot of attention lately even in medical circles Many people are having their vitamin D levels tested and are surprised to find out that they are low in this essential hormone What exactly is Vitamin D and why should you care about your Vitamin D levels How does sunscreen use contribute to deficiency in this important vitamin and what can we do to remedy the deficiency This book has been written in such a way that you will be able to absorb the contents in less than it takes to travel from one point to another in a bus or train ride **A Companion to African-American Philosophy** Tommy L.
