power of advertising and the media to mold children's thoughts and behaviors. The book features vignettes with teenagers explaining in their own words how advertising determines their needs, wants, and self-esteem. An in-depth analysis of this research reveals the influence of media on a young person's desire to conform, shows how broadcasted depictions of beauty distort the identities of children and teens, and uncovers corporate agendas for manipulating behavior in the younger generation. The work concludes with the position that corporations are shaping children to be efficient consumers but in return are harming their developing young minds and physical well-being.

Cultures of Violence Ruth Kinna, Gillian Whiteley, 2020-04-16

Investigating art practitioners' responses to violence, this book considers how artists have used art practices to rethink concepts of violence and non-violence. It explores the strategies that artists have deployed to expose physical and symbolic violence through representational, performative, and interventional means. It examines how intellectual and material contexts have affected art interventions and how visual arts can open up critical spaces to explore violence without reinforcement or recuperation. Its premises are that art is not only able to contest prevailing norms about violence but that contemporary artists are consciously engaging with publics through their practice in order to do so. Contributors respond to three questions: how can political violence be understood or interpreted through art? How are publics understood or identified? How are art interventions designed to shift, challenge, or respond to public perceptions of political violence, and how are they constrained by them? They discuss violence in the everyday and at state level: the Watts Rebellion and Occupy, repression in Russia, domination in Hong Kong, the violence of migration, and the unfolding art activist logic of the sigma portfolio. Asking how public debates can be shaped through the visual and performing arts and setting taboos about violence to one side, the volume provides an innovative approach to a perennial issue of interest to scholars of international politics, art, and cultural studies.
