

CP9550DW

Two advanced technologies for
even sharper images.

Mitsubishi has succeeded again in setting a new standard for digital photo printing: the CP9550DW featuring two brilliant new technologies. The secret behind its outstanding image quality is the Dual Line Technology, which operates with the double number of heating elements. The result: crystal clear, true-to-detail prints. Additionally, the Mitsubishi Adaptive Thermal-Head Management Engine (AMME) guarantees sharp color definition and fast printing with its optimized thermal-head pulse control.

Mitsubishi's paper roll concept proves that state-of-the-art photo printing can be economical, too. Coreless high-capacity

paper rolls require far less frequent replacement, while ensuring trouble-free printing. A special coating on the paper's back reduces wear on the transport mechanism. The thermal heads are also coated to increase their service life. So you can count on the CP9550DW for not only exceptional image quality, but also long and economical operation.

- Printing time: approx. 16 sec./print (10 x 15 cm in line mode)
- Five photo formats available (up to 10 x 23 cm)
- High-capacity paper rolls (up to 550 prints)
- Durable, reliable and easy to maintain
