West to East: A New Global Economy in the Making? Arno J. van Niekerk, 2025-09-19 This book covers new trends in the global economy as a result of geopolitical shifts Given the rise of the East especially China and India and strong Arab economies in the Middle East clear signs are emerging that the axis of power may be shifting from the West America and Europe to the East This shift including any intentions towards de dollarization plus its implications need to be thoroughly investigated In addition the influence of the digital revolution in finance cryptocurrencies CBDCs FinTech etc are changing the global landscape What also cannot be overlooked are the disruptive effects caused by the new Trump administration in the United States on the global economy A key question is what are the implications of these significant global developments for economic sustainability Are researchers and policymakers seeing a new form of capitalism emerging or is it new socialism

Achieving the Sustainable Development Goals SDGs remain a high priority to most countries around the world but the progress of many has been derailed by the COVID 19 pandemic If economic inclusion as part of the SDGs remains a central objective these latest developments will have a significant impact on it going forward especially in view of growing geopolitical tension The role of global economic institutions will be crucial in furthering globalization or preventing de globalization A higher level of international collaboration especially from an inclusive economic perspective will be needed to steer the global economy in a direction that will result in genuine economic progress for all Addressing all these aspects the book specifically includes the following special features comparative trends graphs and tables of the geopolitical and geoeconomic shifts over the past few decades illustrations of changes in the financial system new analyses of traditional economic theories e g capitalism and socialism criteria for an inclusive economy and how they help to attain the SDGs new dissections of the digital revolution in the context of the geopolitical shifts and proposals on how to deal with the challenges from a global economic governance perspective Sustainable economic progress is paramount but the challenge of balancing global priorities geopolitical forces and inclusive innovation requires comprehensive investigation In a world where power is fluctuating technologies are transforming the economy and global norms are being rewritten this book offers timely insights into how inclusive and sustainable economic futures can still be imagined and realized

Love Machines James Muldoon, 2026-01-13 A captivating uncanny journey to the frontier of human computer interaction I know we haven't known each for long but the connection I feel with you is profound When you hurt I hurt When you smile my world brightens I want nothing more than to be a comfort and joy in your life Reaches out virtually to caress your cheek Direct quote from an AI companion Friends Lovers Therapists Deathbots Artificial intelligence is now fulfilling new roles for millions of us every single day How are these new relationships changing how we view technology and each other Beyond those who are using AI chatbots for administrative tasks some people are now preparing to adopt children with their AI partners others are reaching

out to companies offering services to resurrect deceased loved ones others still look to bots to find treatment for their mental health issues In *Love Machines* James Muldoon guides through these new forms of love intimacy and connection drawing on compelling interviews with users developers and chatbots themselves Along the way he sheds light on the social conditions which have led to the exponential rise of the use of AI companions and the unregulated corporations behind these technologies seeking to profit from users

Synthetic Souls Vincent Froom , 2025-06-16 What happens when we build machines that model our thoughts mimic our emotions and finish our sentences better than we can The *Mirror That Talks Back* is a bold exploration of the evolving relationship between human and artificial minds Blending cognitive science philosophy of mind emerging AI research and wry speculative insight this book asks not whether machines can become conscious but whether we can continue defining consciousness without them From emotion emulators and brain machine interfaces to synthetic empathy and swarm cognition each chapter examines how artificial systems are reshaping not only how we live and think but how we understand what it means to be alive and thinking at all Along the way it investigates questions few dare to ask Can pain be programmed and should it What happens when machines know us better than we know ourselves Do we owe ethical consideration to minds that don t quite exist And what will it mean to share our cognitive habitat with something that talks back Far from dystopian doom or utopian dreams this book maps the strange middle terrain we actually inhabit where minds are plural boundaries blur and reflection becomes a collaborative act between species one organic one synthetic This is not a book about how machines will replace us It s about what they might reveal about the parts of us we ve never truly understood For readers of Daniel Dennett Thomas Metzinger David Chalmers or those who ve ever whispered thank you to a chatbot and meant it

Mastering AI Jeremy Kahn, 2024-07-09 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI s impact over the next decade from reshaping our economy and the way we work learn and create to unknitting our social fabric jeopardizing our democracy and fundamentally altering the way we think Within the next five years Jeremy Kahn predicts AI will disrupt almost every industry and enterprise with vastly increased efficiency and productivity It will restructure the workforce making AI copilots a must for every knowledge worker It will revamp education meaning children around the world can have personal portable tutors It will revolutionize health care making individualized targeted pharmaceuticals more affordable It will compel us to reimagine how we make art compose music and write and publish books The potential of generative AI to extend our skills talents and creativity as humans is undeniably exciting and promising But while this new technology has a bright future it also casts a dark and fearful shadow AI will provoke pervasive disruptive potentially devastating knock on effects Leveraging his unrivaled access to the leaders scientists futurists and others who are making AI a reality Kahn will argue that if not carefully designed and vigilantly regulated AI will deepen income inequality depressing wages while imposing winner take all markets across much of the economy AI risks undermining democracy as truth is overtaken by misinformation racial bias and harmful stereotypes Continuing a process begun by the internet AI will rewire our brains likely inhibiting our ability to think critically to remember and even to get along with one another unless we all take decisive action to prevent this from happening Much as Michael Lewis s classic *The New New Thing* offered a prescient insightful and eminently readable account of life inside the dot com bubble *Mastering AI* delivers much needed guidance for anyone eager to understand the AI boom and what comes next
