Mastering AI Jeremy Kahn, 2025-07-08. A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI's impact over the next decade from reshaping our economy and the way we work, learn and create to unknitting our social fabric, jeopardizing our democracy and fundamentally altering the way we think. Within the next five years, Jeremy Kahn predicts AI will disrupt almost every industry and enterprise with vastly increased efficiency and productivity. It will restructure the workforce making AI copilots a must for every knowledge worker. It will revamp education meaning children around the world can have personal portable tutors. It will revolutionize health care making individualized targeted pharmaceuticals more affordable. It will compel us to reimagine how we make art, compose music and write and publish books. The potential of generative AI to extend our skills, talents and creativity as humans is undeniably exciting and promising. But while this new technology has a bright future, it also casts a dark and fearful shadow. AI will provoke pervasive disruptive, potentially devastating knock on effects. Leveraging his unrivaled access to the leaders, scientists, futurists and others who are making AI a reality, Kahn will argue that if not carefully designed and vigilantly regulated, AI will deepen income inequality, depressing wages while imposing winner take all markets across much of the economy. AI risks undermining democracy as truth is overtaken by misinformation, racial bias and harmful stereotypes. Continuing a process begun by the internet, AI will rewire our brains, likely inhibiting our ability to think critically, to remember and even to get along with one another unless we all take decisive action to prevent this from happening. Much as Michael Lewis's classic *The New New Thing* offered a prescient insightful and eminently readable account of life inside the dot com bubble, *Mastering AI* delivers much needed guidance for anyone eager to understand the AI boom and what comes next. *Routledge Handbook of Korean Business and Management* Chris Rowley, Johnseok Bae, Hicheon Kim, Heechun Kim, 2025-02-20.
