Behavior Dynamics in Media-Sharing Social Networks H. Vicky Zhao,W. Sabrina
 Lin,K. J. Ray Liu,2011-04-14 In large scale media sharing social networks where millions of users create share link and reuse
 media content there are clear challenges in protecting content security and intellectual property and in designing scalable
 and reliable networks capable of handling high levels of traffic This comprehensive resource demonstrates how game theory
 can be used to model user dynamics and optimize design of media sharing networks It reviews the fundamental
 methodologies used to model and analyze human behavior using examples from real world multimedia social networks With a
 thorough investigation of the impact of human factors on multimedia system design this accessible book shows how an
 understanding of human behavior can be used to improve system performance Bringing together mathematical tools and
 engineering concepts with ideas from sociology and human behavior analysis this one stop guide will enable researchers to
 explore this emerging field further and ultimately design media sharing systems with more efficient secure and personalized
 services

Wireless Network Pricing Jianwei Huang,Lin Gao,2022-06-01 Today s wireless communications and
 networking practices are tightly coupled with economic considerations to the extent that it is almost impossible to make a
 sound technology choice without understanding the corresponding economic implications This book aims at providing a
 foundational introduction on how microeconomics and pricing theory in particular can help us to understand and build better
 wireless networks The book can be used as lecture notes for a course in the field of network economics or a reference book
 for wireless engineers and applied economists to understand how pricing mechanisms influence the fast growing modern
 wireless industry This book first covers the basics of wireless communication technologies and microeconomics before going
 in depth about several pricing models and their wireless applications The pricing models include social optimal pricing
 monopoly pricing price differentiation oligopoly pricing and network externalities supported by introductory discussions of
 convex optimization and game theory The wireless applications include wireless video streaming service provider

competitions cellular usage based pricing network partial price differentiation wireless spectrum leasing distributed power control and cellular technology upgrade More information related to the book including references slides and videos can be found at ncel.ie.cuhk.edu.hk/content/wireless-network-pricing

Cooperative Environments for Distributed Systems Engineering Khalil Drira, Andrea Martelli, Thierry Villemur, 2003-06-30 The engineering life cycle for complex systems design and development where partners are dispersed in different locations requires the set up of adequate and controlled processes involving many different disciplines The design integration and the final system physical functional integration and qualification imply a high degree of cross interaction among the partners The place technical information systems supporting the life cycle activities are specialized with respect to the needs of each actor in the process chain and are highly heterogeneous between them To globally innovate in place processes specialists must be able to work as a unique team in a virtual enterprise model To this aim it is necessary to make interoperable the different technical information systems and to define co operative engineering processes which take into account distributed roles shared activities and distributed process controls In this frame an innovative study aimed at addressing this process with the goal of identifying proper solutions in terms of design implementation and deployment has been carried out with the support of the European Community and the participation of major industrial companies and research centers

Handbook on Session Initiation Protocol Radhika Ranjan Roy, 2018-09-03 Session Initiation Protocol SIP standardized by the Internet Engineering Task Force IETF has emulated the simplicity of the protocol architecture of hypertext transfer protocol HTTP and is being popularized for VoIP over the Internet because of the ease with which it can be meshed with web services However it is difficult to know exactly how many requests for comments RFCs have been published over the last two decades in regards to SIP or how those RFCs are interrelated Handbook on Session Initiation Protocol Networked Multimedia Communications for IP Telephony solves that problem It is the first book to put together all SIP related RFCs with their mandatory and optional texts in a chronological and systematic way so that it can be used as a single super SIP RFC with an almost one to one integrity from beginning to end allowing you to see the big

picture of SIP for the basic SIP functionalities It is a book that network designers software developers product manufacturers implementers interoperability testers professionals professors and researchers will find to be very useful The text of each RFC from the IETF has been reviewed by all members of a given working group made up of world renowned experts and a rough consensus made on which parts of the drafts need to be mandatory and optional including whether an RFC needs to be Standards Track Informational or Experimental Texts ABNF syntaxes figures tables and references are included in their original form All RFCs along with their authors are provided as references The book is organized into twenty chapters based on the major functionalities features and capabilities of SIP

GNU/Linux Rapid Embedded Programming Rodolfo Giometti, 2017-03-29 An annotated guide to program and develop GNU Linux Embedded systems quickly Key Features Rapidly design and build powerful prototypes for GNU Linux Embedded systems Become familiar with the workings of GNU Linux Embedded systems and how to manage its peripherals Write monitor and configure applications quickly and effectively manage an external micro controller and use it as co processor for real time tasks Book Description Embedded computers have become very complex in the last few years and developers need to easily manage them by focusing on how to solve a problem without wasting time in finding supported peripherals or learning how to manage them The main challenge with experienced embedded programmers and engineers is really how long it takes to turn an idea into reality and we show you exactly how to do it This book shows how to interact with external environments

through specific peripherals used in the industry We will use the latest Linux kernel release 4.4.x and Debian Ubuntu distributions with embedded distributions like OpenWrt and Yocto The book will present popular boards in the industry that are user friendly to base the rest of the projects on BeagleBone Black SAMA5D3 Xplained Wandboard and system on chip manufacturers Readers will be able to take their first steps in programming the embedded platforms using C Bash and Python PHP languages in order to get access to the external peripherals More about using and programming device driver and accessing the peripherals will be covered to lay a strong foundation The readers will learn how to read write data from to the external environment by using both C programs or a scripting language Bash PHP Python and how to configure a device driver for a specific hardware After finishing this book the readers will be able to gain a good knowledge level and understanding of writing configuring and managing drivers controlling and monitoring applications with the help of efficient quick programming and will be able to apply these skills into real world projects What you will learn Use embedded systems to implement your projects Access and manage peripherals for embedded systems Program embedded systems using languages such as C Python Bash and PHP Use a complete distribution such as Debian or Ubuntu or an embedded one such as OpenWrt or Yocto Harness device driver capabilities to optimize device communications Access data through several kinds of devices such as GPIO s serial ports PWM ADC Ethernet WiFi audio video I2C SPI One Wire USB and CAN Who this book is for This book targets Embedded System developers and GNU Linux programmers who would like to program Embedded Systems and perform Embedded development The book focuses on quick and efficient prototype building Some experience with hardware and Embedded Systems is assumed as is having done some previous work on GNU Linux systems Knowledge of scripting on GNU Linux is expected as well

Scalable Continuous Media Streaming Systems Jack Lee, 2005-11-01
Continuous media streaming systems will shape the future of information infrastructure The challenge is to design systems and networks capable of supporting millions of concurrent users Key to this is the integration of fault tolerant mechanisms to prevent individual component failures from disrupting systems operations These are just some of the hurdles that need to be overcome before large scale continuous media services such as video on demand can be deployed with maximum efficiency The author places the subject in context drawing together findings from the past decade of research whilst examining the technology s present status and its future potential The approach adopted is comprehensive covering topics notably the scalability and fault tolerance issues that previously have not been treated in depth Provides an accessible introduction to the technology presenting the basic principles for media streaming system design focusing on the need for the correct and timely delivery of data Explores the use of parallel server architectures to tackle the two key challenges of scalability and fault tolerance Investigates the use of network multicast streaming algorithms to further increase the scalability of very large scale media streaming systems Illustrates all findings using real world examples and case studies gleaned from cutting edge worldwide research Combining theory and practice this book will appeal to industry specialists working in content

distribution in general and continuous media streaming in particular The introductory materials and basic building blocks complemented by amply illustrated more advanced coverage provide essential reading for senior undergraduates postgraduates and researchers in these fields

Netflix and Streaming Video Amanda D. Lotz, 2022-07-22 Netflix and Streaming Video is the first book to provide a comprehensive foundation for understanding the business of subscriber funded streaming video and its implications for the role of these services in culture Drawing on Lotz's two decades of research it highlights the similarities and differences among streaming video services Netflix Amazon and video distribution technologies broadcast satellite internet Making a number of provocative and thought provoking arguments the book first reveals how the reliance on subscriber payment and video on demand produces different norms and strategies compared to previous video businesses It then investigates Netflix and how its particular blend of characteristics distinguishes it from other subscriber funded video on demand services The author expertly shows that by understanding the underlying economic and technological dynamics of these services and their differences it is possible to better assess the actions taken by the companies and what the future of video may encompass The book is a must read for students and scholars of Media and Communications Studies as well as those wishing to learn more about Netflix and streaming video services
