Cristea, Vania Dimitrova, 2022-07-25 This two volume set LNAI 13355 and 13356 constitutes the refereed proceedings of the 23rd International Conference on Artificial Intelligence in Education AIED 2022 held in Durham UK in July 2022 The 40 full papers and 40 short papers presented together with 2 keynotes 6 industry papers 12 DC papers 6 Workshop papers 10 Practitioner papers 97 Posters and Late Breaking Results were carefully reviewed and selected from 243 submissions The conference presents topics such as intelligent systems and the cognitive sciences for the improvement and advancement of education the science and engineering of intelligent interactive learning systems The theme for the AIED 2022 conference was AI in Education Bridging the gap between academia business and non profit in preparing future proof generations towards ubiquitous AI

Artificial Intelligence Tools Book Manish Soni, 2024-11-13 Welcome to the exciting and rapidly evolving world of artificial intelligence AI This book Artificial Intelligence Tools Unlocking the Power of Intelligent Systems is designed to be your comprehensive guide to understanding implementing and leveraging the cutting edge tools that drive the advancements in AI Whether you are a seasoned professional in the field or a

curious newcomer this book aims to provide you with valuable insights and practical knowledge to navigate the multifaceted landscape of AI tools From machine learning algorithms to neural networks readers will gain insights into the core concepts that form the backbone of intelligent systems We aim to make complex ideas accessible ensuring that readers regardless of their technical background can grasp the essentials of AI Furthermore we recognize the ethical implications and societal considerations surrounding AI In a dedicated section we address the responsible use of AI tools discussing issues such as bias in algorithms transparency and accountability It is crucial for individuals working with AI to understand the ethical dimensions of their work and strive towards the development of AI systems that align with human values and promote inclusivity In addition to the technical aspects this book emphasizes the importance of continuous learning and adaptation in the rapidly evolving field of AI The final sections explore emerging trends such as reinforcement learning autonomous systems and AI driven creativity offering readers a glimpse into the future of artificial intelligence

Key Features

- 1 Extensive Theoretical Content The book covers the full spectrum of topics from fundamental concepts to advanced techniques Each chapter is designed to build on the previous one ensuring a logical progression and deep comprehension of the subject matter
- 2 Online Test Papers To reinforce your learning we provide a series of online test papers that mimic real world scenarios and challenges These tests are designed to evaluate your understanding and help you identify areas that need further study
- 3 Video Tutorials Understanding concepts can sometimes be challenging through text alone Our book includes links to a series of video tutorials that provide visual and auditory explanations of complex topics These videos are created by experts and are intended to complement the written material offering a more immersive learning experience
- 4 Practical Applications Each chapter includes real world examples and case studies that illustrate how application is applied across different industries
- 5 Self Assessment Tools At the end of each chapter self assessment questions and exercises allow you to test your understanding and track your progress These tools are invaluable in helping you gauge your readiness and build confidence as you move forward

Whether you are an aspiring data scientist a business professional exploring AI application or an academic researcher pushing the boundaries of knowledge Artificial Intelligence Tools is crafted to be a valuable companion on your journey As you embark on this exploration of artificial intelligence we encourage you to engage with the content experiment with the tools and contribute to the ongoing dialogue surrounding the responsible development and application of intelligent systems The future of AI is in your hands and we are excited to be part of your learning journey

Uses of Artificial Intelligence in STEM Education Xiaoming Zhai, Joseph Krajcik, 2024-10-09 In the age of rapid technological advancements the integration of Artificial Intelligence AI machine learning ML and large language models LLMs in Science Technology Engineering and Mathematics STEM education has emerged as a transformative force reshaping pedagogical approaches and assessment methodologies *Uses of AI in STEM Education* comprising 25 chapters delves deep into the multifaceted realm of AI driven STEM education It begins by exploring the challenges and opportunities of AI based STEM education emphasizing the intricate balance between human tasks and technological tools As the chapters unfold readers learn about innovative AI applications from automated scoring systems in biology chemistry physics mathematics and engineering to intelligent tutors and adaptive learning The book also touches upon the nuances of AI in supporting diverse learners including students with learning disabilities and the ethical considerations surrounding AI's growing influence in educational settings It showcases the transformative potential of AI in reshaping STEM education emphasizing the need for adaptive pedagogical strategies that cater to diverse learning needs in an AI centric world The chapters further delve into the practical applications of AI from scoring teacher observations and analyzing classroom videos using neural networks to the broader implications of AI for STEM assessment practices Concluding with reflections on the new paradigm of AI based STEM education this book serves as a comprehensive guide for educators researchers and policymakers offering insights into the future of STEM education in an AI driven world *Generative AI: Principles, Techniques and Innovations* Dr. Muthukumar Subramanian, Dr. Amit Shukla, Er. Arshadhafiez Khan, Dr. Tanmay Agrawal, 2025-03-04 *Generative AI Principles Techniques and Innovations* provides an in depth exploration of the field of Generative Artificial Intelligence presenting both theoretical foundations and practical implementations The book is structured into ten chapters covering essential topics such as machine learning fundamentals probabilistic models neural networks and various generative techniques including GANs VAEs and Diffusion Models The latter sections delve into real world applications ethical considerations and the tools and frameworks essential for building generative models Readers will gain insights into AI's role in content creation synthetic data generation and medical imaging along with enterprise and research applications The final chapter discusses the future of Generative AI its integration with other AI domains and its potential to shape the digital landscape This book is crafted to be an accessible yet rigorous resource for students AI enthusiasts and professionals in the tech industry By blending theoretical discussions with practical examples we aim to provide a holistic view of Generative AI enabling readers to leverage its capabilities responsibly and effectively *Deep*

Learning in Action: Image and Video Processing for Practical Use Abdussalam Elhanashi, Sergio Saponara, 2025-03-12

Artificial intelligence technology has entered an extraordinary phase of fast development and wide application. The techniques developed in traditional AI research areas such as computer vision and object recognition have found many innovative applications in an array of real world settings. The general methodological contributions from AI such as a variety of recently developed deep learning algorithms have also been applied to a wide spectrum of fields such as surveillance applications, real time processing, IoT devices and health care systems. The state of the art and deep learning models have wider applicability and are highly efficient. *Deep Learning in Action: Image and Video Processing for Practical Use* provides a comprehensive and accessible resource for both intermediate to advanced readers seeking to harness the power of deep learning in the domains of video and image processing. The book bridges the gap between theoretical concepts and practical implementation by emphasizing lightweight approaches enabling readers to efficiently apply deep learning techniques to real world scenarios. It focuses on resource efficient methods making it particularly relevant in contexts where computational constraints are a concern. Provides step by step guidance on implementing deep learning techniques specifically for video and image processing tasks in real world scenarios. Emphasizes lightweight and efficient approaches to deep learning ensuring that readers learn techniques that are suited to resource constrained environments. Covers a wide range of real world applications such as object detection, image segmentation, video classification. Offers a comprehensive understanding of how deep learning can be leveraged across various domains. Encourages hands on experience that can be applied to the concepts to existing projects.

Artificial Intelligence Learning Facilitators Fadi Al-Turjman, 2025-10-28. *Artificial Intelligence Learning Facilitators: Creating Smart Education Systems* delves into the various AI based techniques such as machine learning and natural language processing that can help in automating management tasks such as lecture preparation, students performance evaluation and predictive performance assessment. It highlights the importance of AI in handling the increasing learning complexities. The book explores the use of AI based virtual assistants and chatbots in enhancing teaching services for students and instructors. It also discusses the potential of AI in creating personalized and targeted learning experiences. The centerpiece of the book is a presentation of the learning and teaching system AI Prof DUX. The use cases cover such scenarios as Question generation for quizzes and exams, The development and implementation of lecture scheduling, The lecture notes generator, Examination platform, Lecture video link generation, Classroom chat platform, Courses management. The book is an exploration of the crucial role of AI as a game changer in educational transformation. It emphasizes how AI can positively impact various aspects of smart education systems.

Video Capsule Endoscopy Martin Keuchel, Friedrich Hagenmüller, Hisao Tajiri, 2025-06-16.
