University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **Intelligent**

Robin Hood Math Noah

Giansiracusa,2025-08-05 How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that s sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies more profitable But all this comes at a price It s easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It s time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You ll learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive

Application of Bioinformatics in Cancers Chad Brenner,2019-11-20 This collection of 25

research papers comprised of 22 original articles and 3 reviews is brought together from international leaders in bioinformatics and biostatistics The collection highlights recent computational advances that improve the ability to analyze highly complex data sets to identify factors critical to cancer biology Novel deep learning algorithms represent an emerging and highly valuable approach for collecting characterizing and predicting clinical outcomes data The collection highlights several of these approaches that are likely to become the foundation of research and clinical practice in the future In fact many of these technologies reveal new insights about basic cancer mechanisms by integrating data sets and structures that were previously immiscible Accordingly the series presented here bring forward a wide range of artificial intelligence approaches and statistical methods that can be applied to imaging and genomics data sets to identify previously unrecognized features that are critical for cancer Our hope is that these articles will serve as a foundation for future research as the field of cancer biology transitions to integrating electronic health record imaging genomics and other complex
