Explore the capabilities of machine learning and neural networks This comprehensive guidebook is tailored for professional programmers seeking to deepen their understanding of neural networks machine learning techniques and large language models LLMs The book explores the core of machine learning techniques covering essential topics such as data pre processing model selection and customization It provides a robust foundation in neural network fundamentals supplemented by practical case studies and projects You will explore various network topologies including Deep Neural Networks DNN

Recurrent Neural Networks RNN Long Short Term Memory LSTM networks Variational Autoencoders VAE Generative Adversarial Networks GAN and Large Language Models LLMs Each concept is explained with clear step by step instructions and accompanied by Python code examples using the latest versions of TensorFlow and Keras ensuring a hands on learning experience By the end of this book you will gain practical skills to apply these techniques to solving problems Whether you are looking to advance your career or enhance your programming capabilities this book provides the tools and knowledge needed to excel in the rapidly evolving field of machine learning and neural networks

What You Will Learn Grasp the fundamentals of various neural network topologies including DNN RNN LSTM VAE GAN and LLMs Implement neural networks using the latest versions of TensorFlow and Keras with detailed Python code examples Know the techniques for data pre processing model selection and customization to optimize machine learning models Apply machine learning and neural network techniques in various professional scenarios

Who This Book Is For Data scientists machine learning enthusiasts and software developers who wish to deepen their understanding of neural networks and machine learning techniques

Vector Search for Practitioners with Elastic Bahaaldine Azarmi, Jeff Vestal, 2023-11-30 This book delves into the practical applications of vector search in Elastic and embodies a broader philosophy It underscores the importance of search in the age of Generative AI and Large Language Models This narrative goes beyond the how to address the why highlighting our belief in the transformative power of search and our dedication to pushing boundaries to meet and exceed customer expectations

Shay Banon Founder CTO at Elastic

Key Features Install configure and optimize the ChatGPT Elasticsearch plugin with a focus on vector data Learn how to load transformer models generate vectors and implement vector search with Elastic Develop a practical understanding of vector search including a review of current vector databases

Purchase of the print or Kindle book includes a free PDF eBook

Book Description While natural language processing NLP is largely used in search use cases this book aims to inspire you to start using vectors to overcome equally important domain challenges like observability and cybersecurity The chapters focus mainly on integrating vector search with Elastic to enhance not only their search but also observability and cybersecurity capabilities The book which also features a foreword written by the founder of Elastic begins by teaching you about NLP and the functionality of Elastic in NLP processes Here you ll delve into resource requirements and find out how vectors are stored in the dense vector type along with specific page cache requirements for fast response times As you advance you ll discover various tuning techniques and strategies to improve machine learning model deployment including node scaling configuration tuning and load testing with Rally and Python You ll also cover techniques for vector search with images fine tuning models for improved performance and the use of clip models for image similarity search in Elasticsearch Finally you ll explore retrieval augmented generation RAG and learn to integrate ChatGPT with Elasticsearch to leverage vectorized data ELSER s capabilities and RRF s refined search mechanism By the end of this NLP book you ll have all the necessary skills needed to implement and optimize vector search

in your projects with Elastic What you will learn Optimize performance by harnessing the capabilities of vector search Explore image vector search and its applications Detect and mask personally identifiable information Implement log prediction for next generation observability Use vector based bot detection for cybersecurity Visualize the vector space and explore Search Next with Elastic Implement a RAG enhanced application using Streamlit Who this book is for If you re a data professional with experience in Elastic observability search or cybersecurity and are looking to expand your knowledge of vector search this book is for you This book provides practical knowledge useful for search application owners product managers observability platform owners and security operations center professionals Experience in Python using machine learning models and data management will help you get the most out of this book

Natural Language Processing in Action, Second Edition Hobson Lane, Maria Dyshel, 2025-02-25. Develop your NLP skills from scratch with an open source toolbox of Python packages: Transformers, Hugging Face, vector databases and your own Large Language Models. Natural Language Processing in Action, Second Edition has helped thousands of data scientists build machines that understand human language. In this new and revised edition you will discover state of the art Natural Language Processing (NLP) models like BERT and HuggingFace transformers, popular open source frameworks for chatbots and more. You will create NLP tools that can detect fake news, filter spam, deliver exceptional search results and even build truthfulness and reasoning into Large Language Models (LLMs). In Natural Language Processing in Action, Second Edition you will learn how to process, analyze, understand and generate natural language text. Build production quality NLP pipelines with spaCy. Build neural networks for NLP using PyTorch. BERT and GPT transformers for English composition, writing code and even organizing your thoughts. Create chatbots and other conversational AI agents. In this new and revised edition you will discover state of the art NLP models like BERT and HuggingFace transformers, popular open source frameworks for chatbots and more. Plus you will discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results. About the technology: From nearly human chatbots to ultra personalized business reports to AI generated email, news stories and novels, natural language processing (NLP) has never been more powerful. Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications. This book is your entrance ticket and backstage pass into the next generation of natural language processing. About the book: Natural Language Processing in Action, Second Edition introduces the foundational technologies and state of the art tools you will need to write and publish NLP applications. You learn how to create custom models for search, translation, writing assistants and more without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, Hugging Face transformers, fine tuning large language models and more. What's inside: NLP pipelines with spaCy, Neural networks with
