Hersh, Robert E. Hoyt, 2018

Health informatics is the discipline concerned with the management of healthcare data and information through the application of computers and other information technologies. The field focuses more on identifying and applying information in the healthcare field and less on the technology involved. Our goal is to stimulate and educate healthcare and IT professionals and students about the key topics in this rapidly changing field. This seventh edition reflects the current knowledge in the topics listed below and provides learning objectives, key points, case studies, and extensive references. Pervasive and Smart Technologies for Healthcare: Ubiquitous Methodologies and Tools Coronato, Antonio, De Pietro, Giuseppe, 2010-03-31. This book reports several experiences concerning the application of pervasive computing technologies, methodologies, and tools in healthcare. Provided by publisher. *MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation* Paula Otero, Philip Scott, Susan Z. Martin, 2022-08-15.

The World Health Organization defines health as a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity, and its constitution also asserts that health for all people is dependent on the fullest co-operation of individuals and States. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories, and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health: Global Partnership for Digital Innovation, and submissions were requested under 5 themes: information and knowledge management, quality, safety, and outcomes, health data science, human, organizational, and social aspects, and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers, and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

Medical Anthropology and the World System Hans A. Baer, Merrill Singer, Ida Susser, 2013-05-23. Now in its third edition, this textbook serves to frame understandings of health, health-related behavior, and health care in light of social and health inequality as well as structural violence. It also examines how the exercise of power in the health arena and in society overall impacts human health and well-being. **Medical Anthropology and the World System: Critical Perspectives, Third Edition** includes updated and expanded information on medical anthropology, resulting in an even more comprehensive resource for undergraduate students, graduate students, and researchers worldwide. As in the previous versions of this text, the authors provide insights from the perspective of critical medical anthropology, a well-established theoretical viewpoint from which faculty, researchers, and students study medical anthropology. It addresses the nature and scope of medical anthropology, the biosocial and political/ecological origins of disease, health inequities, and social suffering, and the nature of medical systems in indigenous and pre-capitalist state societies and modern societies. The third edition also includes new material on the relationship between climate change and health. Finally, this textbook explores health praxis and the struggle for a healthy world.
