School Library Journal, 2006 *The Young Ladies' Journal*, 1872 *Networked Artificial Intelligence* Radhika Ranjan Roy, 2024-10-30. The integration of fifth generation 5G wireless technologies with distributed artificial intelligence (AI) is transforming network operations. AI is increasingly embedded in all network elements from cloud and edge to terminal devices, enabling AI to function as a networking system. This convergence facilitates AI-based applications across the global network with notable successes in various domains such as computer vision, natural language processing, and healthcare. *Networked Artificial Intelligence: AI Enabled 5G Networking* is a comprehensive framework for the deep integration of computing and communications, optimizing networks and applications as a unified system using AI. The book covers topics ranging from networked AI fundamentals to AI-enabled 5G networks, including agent modeling, machine learning (ML) algorithms, and network protocol architectures. It discusses how network service providers can leverage AI and ML techniques to customize network baselines, reduce noise, and accurately identify issues. It also looks at AI-driven networks that enable self-correction for maximum uptime and prescriptive actions for issue resolution, as well as troubleshooting by capturing and storing data before network events. The book presents a comprehensive approach to AI-enabled networking that offers unprecedented opportunities for efficiency, reliability, and innovation in telecommunications. It works through the approach's five steps: connection, communication, collaboration, curation, and community. These steps enhance network effects, empowering operators with insights for trusted automation, cost reduction, and optimal user experiences. The book also discusses AI and ML capabilities that enable networks to continuously learn, self-optimize, and predict and rectify service degradations proactively, even with full automation.
