Politics and Racism Beyond Nations J. P. Linströth, 2022-01-18 This book brings together theoretical knowledge from diverse fields as anthropology biology neurology peace studies political science psychology and sociology to address key challenges that transcend borders It demonstrates how differences are created on many levels to reveal how the othering project is evident through national policies of immigration through aspiring nationalisms through genocidal inhumanity and the subsequent effects of such othering evident in racial trauma It further argues that we cannot limit our understanding of racism to forms of white nationalism or whiteness movements in the developed world and regions but look to the global formulation of such discrimination in colonial histories The book introduces each chapter by providing rich ethnographic narratives from informants based upon the author's research on nationalism racism genocide terrorism trauma scientific tolerance and love and peace as well as some auto ethnographic narratives from the author's research on these themes

Nature That Makes Us Human Michel Loreau, 2023 This book seeks to answer two fundamental questions Why do we keep destroying nature when science makes it clear that in doing so we risk our own destruction How can we stop doing so and regain the unity of humans and nature First the book shows that the inability of modern society to modify its relationship with nature has its roots in the collective fictions that have gradually shaped it since the Neolithic revolution The collective fictions that underpin modernity include in particular the subject object duality the matter mind duality the primacy of rationality and the superiority of the human species over all other living beings These deeply ingrained fictions prevent us from acting in the world in agreement with the needs and knowledge that we have Second the book argues that humans have a nature that defines them as a unique species beyond their cultural differences and this nature is not made only of flesh and bones but also of a set of fundamental needs Fundamental needs connect humans with nature spontaneously because they are the manifestation of life in them They also make it possible to re establish the unity of body and mind and of the different forms of knowledge and to give the economy a new direction focused on the development of the human being and of its living environment Challenging our collective fictions and reconnecting with our deepest nature is essential if we are to overcome the current ecological crisis and allow life on Earth to flourish

Dodson,2020-10-06 The topic of human free will has received more attention in the past several years due to the important discoveries of neuroscience but no consensus of opinion is evident in related disciplines The traditional approach to understanding free will in philosophy employs conceptual analysis to determine whether humans have freedom of choice Theology affirms that every person has free choice although God is somehow behind all human decisions Evolutionary psychology points to human behavior as the product of biological processes and antecedent events And neuroethics attempts to define what it means to be a thinking moral agent by investigating how neurons in the brain and chemical interactions combine to produce conscious actions An assessment and evaluation of these various positions is given in light of the evidence The issue of whether a person can be held morally responsible for their actions hinges on whether those actions originate from free will or are the result of determinism Theology makes assumptions of the existence of an absolute deity that has a hand in human decision making but there is no agreement regarding the nature of that intervention Recent scientific discoveries confront traditionally held religious beliefs and necessitate the creation of a new theology and articles of faith **Are You Making Love or Just Having Sex?** Elliot D. Cohen,2024-10-15 In making love one is elevated beyond

the carnal desires it satisfies For the religious it is Divine for those who are not religiously inclined it is still a spiritual experience one of seamless solidarity a unity of two as one that defies mere orgasmic stimulation You don t have to make love to have sex Even strangers can be sexually attracted and have an orgasmic escapade But in the act of making love there is symbolic meaning that is felt through and through the sex act Two in love are joined in life and the sexual expression of this unison is deeply felt in the sex act itself This is sexual intimacy the making of love the likes of which is rarely if ever seen outside a loving relationship There is no escape from the philosophical dimensions of such a loving relationship It is as abstract as it is concrete in the ideals that ground it There is a mystery about it a kind of transcendent experience that defies translation into words Making and being in love are thus joined at the hip Loving relationships make the bed in which true lovers sleep Unfortunately many relationships flounder or never get off the ground Just having sex may ease the tension but it then becomes a means not truly an end in itself The moment the sex act ends the couple may retreat and fall into discord It is an oasis in a barren desert that provides temporary relief a titillating temporary escape from reality This book can help you

to overcome the obstacles the unlovable habits that encumber your relationship both inside and outside the bedroom It can help to create the harmonic balance between your sex life and other aspects of your personal and interpersonal relationships which are preludes to making and being in love To accomplish this it applies a five step method based on Logic Based Therapy Consultation LBTC a popular form of evidence based philosophical counseling modality First it introduces you to six types of unlovable ways of thinking and acting and helps you to identify the ones that may be sabotaging your own relationship Second it shows you how to counter these self defeating habits with certain lovable goals virtues of love Third it helps you to identify and embrace a personal love philosophy that empowers you to reach for your lovable goals Fourth it provides core philosophical ideas that are key to any successful quest for romantic love Fifth it helps you construct a behavioral plan that applies your philosophies to making constructive changes in your relationship The latter may require making changes both inside and outside your relationship Thus this book also shows you how the problems you are having in one area of your life at work in your social life etc can affect the quality of your relationship inside and outside the bedroom and it offers guidance including self improvement exercises to overcome these impediments and attain enduring love and sexual intimacy

Anxiety, Modern Society, and the Critical Method Joel Michael Crombez, 2021-03-08 Anxiety Modern Society and the Critical Method interrogates the historical intersections of political economy technology and anxiety By analyzing and building upon the tools developed by critical theorists to diagnose the symptoms of modern life such as alienation anomie the Protestant ethic and repression Joel Michael Crombez convincingly argues for a revitalization of critical social science to better confront the anxiety of life in modern societies With anxiety typically falling under the purview of psychology and its biomedical approach to treatment here anxiety is demonstrated to have origins in the totalizing logics of modern society As such Crombez provides an interdisciplinary roadmap to diagnose and treat anxiety which he calls critical socioanalysis that accounts for the psychosocial complexity of its production

Sedation, Suicide, and the Limits of Ethics James A. Dunson III,2017-12-20

In this book James Dunson explores end of life ethics including physician assisted suicide PAS and continuous sedation until death He argues that ethical debates currently ignore the experience of the dying patient in an effort to focus on policy creation and proposes that the dying experience should instead be prioritized and used to inform policy development The author makes the case that PAS should be recognized as a legally and morally permissible option for a very particular kind of patient terminally ill with fewer than six months to live and capable of conscious consent Since focusing on the patient s experience of this end of life dilemma transforms some of the basic concepts we use to engage in the PAS debate the argument has implications for patient care and the training of medical professionals

Political Nature John M. Meyer,2001-07-20

Concern over environmental problems is prompting us to reexamine established thinking about society and politics The challenge is to find a way for the public s concern for the environment to become more integral to social economic and political decision making Two interpretations have dominated Western portrayals of the nature politics relationship what John Meyer calls the dualist and the derivative The dualist account holds that politics and human culture in general is completely separate from nature The derivative account views Western political thought as derived from conceptions of nature whether Aristotelian teleology the clocklike mechanism of early modern science or Darwinian selection Meyer examines the nature politics relationship in the writings of two of its most pivotal theorists Aristotle and Thomas Hobbes and of contemporary environmentalist thinkers He concludes that we must overcome the limitations of both the dualist and the derivative interpretations if we are to understand the relationship between nature and politics Human thought and action says Meyer should be considered neither superior nor subservient to the nonhuman natural world but interdependent with it In the final chapter he shows how struggles over toxic waste dumps in poor neighborhoods land use in the American West

and rainforest protection in the Amazon illustrate this relationship and point toward an environmental politics that recognizes the experience of place as central **Dwell**, 2001-02 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines **Virtue Hermeneutics** Robert M.
