Effect of Training in the Use of Cloze on the Ability of Fourth Grade Pupils to Gain Information from Written
Discourse Norma Nell Faubion,1971 Two experimental groups and a control were employed for this research which was
 designed to measure the effect of cloze training upon the reading comprehension of fourth grade pupils when the training
 focused upon the use of structure words and verbalization by students concerning responses to cloze exercises Three fourth
 grade classrooms in an elementary school in South Texas were randomly assigned to the two treatment groups and the
 control Stratified random samples of passages approximately one hundred words in length were taken from three social

 were administered to a group of fourth grade students for the purpose of establishing reliability Reliability scores of 909 and
 933 were obtained for Form A and Form B respectively Stratified random samples from the three textbooks were used to
 develop a series of ten cloze lessons each containing two cloze exercises Half of the exercises utilized the fifth word deletion
