Artificial Intelligence and Universal Values Jay Friedenberg, 2024-07-14 The field of value alignment or more broadly machine ethics is becoming increasingly important as artificial intelligence developments accelerate By alignment we mean giving a generally intelligent software system the capability to act in ways that are beneficial or at least minimally harmful to humans There are a large number of techniques that are being experimented with but this work often fails to specify what values exactly we should be aligning When making a decision an agent is supposed to maximize the expected utility of its value function Classically this has been referred to as happiness but this is just one of many things that people value In order to resolve this issue we need to determine a set of human values that represent humanity's interests Although this problem might seem intractable research shows that people of various cultures and religions actually share more in common than they realize In this book we review world religions moral philosophy and evolutionary psychology to elucidate a common set of shared values We then show how these values can be used to address the alignment problem and conclude with problems and goals for future research The key audience for this book will be researchers in the field of ethics and artificial intelligence who are interested in or working on this problem These people will come from various professions and include philosophers computer programmers and psychologists as the problem itself is multi disciplinary Copyright as a Constraint on Creating Technological Value Kasper Drazewski, 2024-01-19 Can we regulate something that doesn't exist yet Can Europe create its own Silicon Valley Who gets to create technological value in today's world Whatever happened to the once flourishing idea of rags to riches Will new and exciting innovations only ever come from big tech companies Can the EU establish its own flexible framework for boosting innovation e.g. by facilitating the transformative use of technologies and

data This book seeks to answer these questions by exploring the differences in copyright culture in Europe and the United States with its flexible fair use framework The findings are anything but obvious and decades of case law on both sides of the Atlantic tell a story of judges going to great lengths to deal with new challenges while navigating the imperfections of statutory law both where it is too broadly formulated and where it is too prescriptive How can the population s creative potential best be fostered What do software innovations have in common with the evolution of living organisms What are the vulnerabilities of distributed creativity Answers are sought in the processes that came into being during the early years of the digital revolution and were then forced to take a back seat as control of the means of production was increasingly placed in the hands of tech companies The findings and insights presented here are highly relevant for today s digital policymaking Market concentration processes in innovation haven t ceased they are ongoing And in an age where data driven services are creating and reinforcing global oligopolies the question posed by the U S Supreme Court in Google v Oracle is now more relevant than ever who should hold the keys to digital innovation

Caring is Sharing — Exploiting the Value in Data for Health and Innovation

Maria Hägglund,Madeleine Blusi,Stefano Bonacina,Lina Nilsson,Inge Cort Madsen,Sylvia Pelayo,Anne Moen,2023-06-15

Modern information and communication technologies make it easier for individuals to be involved in their own health and social care. They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff. Artificial Intelligence (AI) promises to bring even more benefits in the future with more effectiveness and the provision of decision support. This book presents the proceedings of the 33rd Medical Informatics Europe Conference MIE2023 held in Gothenburg, Sweden, from 22 to 25 May 2023. The theme of MIE2023 was Caring is Sharing: Exploiting Value in Data for Health and Innovation, stressing the increasing importance of sharing digital health data and the related challenges. The sharing of health data is developing rapidly both in Europe and beyond, so the focus of the conference was on the enabling of trustworthy sharing of data to improve health. Topics covered include healthcare, community care, self care, public health, and the innovation and development of future-proof digital health solutions, and the almost 300 papers divided into 10 chapters also cover important advances in the sub domains of biomedical informatics, decision support systems, clinical information systems, clinical research informatics, knowledge management and representation, consumer health informatics, natural language processing, public health informatics, privacy, ethical and societal aspects among them. Describing innovative approaches to the collection, organization, analysis, and data sharing related to health and wellbeing, the book contributes to the expertise required to take medical informatics to the next level and will be of interest to all those working in the field.

Learning Web Design Jennifer Robbins, 2025-06-20. Do you want to build web pages but have no prior experience? This friendly guide is the perfect place to start. You'll begin at square one, learning how the web and web pages work, and then steadily build from there. By the end of the book, you'll have the skills to create a simple site with multicolumn pages that adapt for mobile devices. Each chapter provides exercises to help you learn various techniques and short quizzes to make sure you understand key concepts. This thoroughly revised sixth edition is ideal for students and professionals of all backgrounds and skill levels. It's simple and clear enough for beginners, yet thorough enough to be a useful reference for experienced developers keeping their skills up to date. Build HTML pages with text, links, images, tables, and forms. Use style sheets (CSS) for formatting text, colors, backgrounds, page layout, and simple animation effects. Use CSS Flexbox and Grid Layout for sophisticated and flexible page designs. Learn the ins and outs of responsive web design to make web pages look great on all devices. Get an introductory lesson in JavaScript programming and use it to add functionality to web pages. Understand the ways in which JavaScript has become central to the web development workflow. Create and optimize web images so they'll download as quickly as possible. Get to know the superpowers of the SVG format. The sixth edition features a completely rewritten and expanded JavaScript section, written by Aaron Gustafson, that provides more opportunities to practice writing code.
