Building Web Applications with Flask Italo Maia, 2015-06-26 Flask is a powerful web framework that helps you build great projects using your favorite tools Flask takes the flexible Python programming language and provides a simple template for web development Once imported into Python Flask can be used to save time building web applications It goes against the flow with the microframework concept leaving most of the architecture choices to the developer Through its great API extensions and powerful patterns Flask helps you create simple projects in minutes and complex ones as soon as possible From the beginning Building Web Applications with Flask shows you how to utilize

Flask's concepts, extensions, and components to create engaging full featured web projects. You'll learn how to properly handle forms using WTForms, devise convenient templates with Jinja2 tags and macros, use NoSQL and SQL databases to store user data, test your projects with features and unit tests, create powerful authentication and user authorization as well as administrative interfaces with ease and more. As Flask does not enforce an architectural recipe, neither do we. This book makes no coding assumptions on how you should code, leaving you free to experiment.

Ajax: The Complete Reference Thomas Powell, 2008-02-21. The Definitive Guide to Ajax Web Application Development. Evolve from the click and wait programming pattern to the latest Web 2.0 paradigm using this comprehensive guide to Ajax. Written by Web development expert Thomas Powell, the book lays out every feature of Ajax alongside detailed explanations and real world code examples. Ajax: The Complete Reference explains how to create and test Ajax enabled Web applications using the XMLHttpRequest object as well as alternative JavaScript based communication mechanisms. You'll explore a variety of sample applications featuring emerging user interface conventions and build applications that address real world networking and security issues. A robust communication library is developed throughout the book that enables you to architect flexible Ajax applications. The latest technologies such as Web services, Flash, Ajax integration, client side templates, Comet, and Offline Access are also covered. Discover the future of Web development today. Work with traditional JavaScript communication approaches like iframes. Explore all the quirks and details in the XMLHttpRequest object. Handle disparate data formats including XML, JSON, CSV, YAML, and more. Deal with networking issues including timeouts, retries, response ordering, and a variety of server and content errors. Simplify JavaScript programming using open source Ajax libraries like YUI. Secure Ajax applications using authentication, obfuscation, and encryption. Implement common Ajax UI patterns such as auto suggest, click to edit, and drag and drop. Solve troubling Ajax architecture problems including back button history and bookmarking issues. Learn Ajax's role in Web 2.0 and Web services. Explore push style communication using Comet and Flash. Discover the future of offline Web application access and operation.

Scriptin' with JavaScript and Ajax Charles Wyke-Smith, 2010-04-07 JavaScript is the brains of your Web page; it enables you to modify a document's structure, styling and content in response to user actions without requesting new pages from the server. Scriptin with JavaScript and Ajax teaches you how to master this powerful and elegant language so you can develop intuitive user interactions that take the user experience to new levels of sophistication and responsiveness. Today's application like Web experiences such as Salesforce.com and Google Maps and Web 2.0 sites such as Flickr.com and Twitter are powered by JavaScript and Ajax. Using the techniques shown in this book you will be able to start creating similar experiences in the sites you design. Scriptin with JavaScript and Ajax will teach you how to: Start developing with JavaScript fast. Write lightweight but powerful object oriented code. Modify the Document Object Model. Progressively enhance your pages with JavaScript to provide the highest levels of accessibility to all users. Learn sophisticated techniques for making your pages respond to user actions. Use the downloadable Scriptin library of helper functions to speed development and ensure cross browser compatibility. Use Ajax scripting techniques to update specific areas of the page with data from the server. Create powerful interface interactions such as sliding panels and tree menus. Evaluate frameworks such as jQuery and Prototype to find the best one for your needs. Build an online application that looks and responds like a regular desktop application. Easily adapt the Scriptin code examples for use in your own projects; download them at www.scriptinwithajax.com.
