Motherhood, Religion, and Society in Medieval Europe, 400-1400 Lesley Smith, Conrad Leyser, 2016-04-22 Who can concentrate on thoughts of Scripture or philosophy and be able to endure babies crying Will he put up with the constant muddle and squalor which small children bring into the home The wealthy can do so but philosophers lead a very different life So according to Peter Abelard did his wife Heloise state in characteristically stark terms the antithetical demands of family and scholarship Heloise was not alone in making this assumption Sources from Jerome onward never cease to remind us that the life of the mind stands at odds with life in the family For all that we have moved in the past two generations beyond kings and battles fiefs and barons motherhood has remained a blind spot for medieval historians Whatever the reasons the result is that the historiography of the medieval period is largely motherless The aim of this book is to insist that this picture is intolerably one dimensional and to begin to change it The volume is focussed on the paradox of motherhood in the European Middle Ages to be a mother is at once to hold great power and by the same token to be acutely vulnerable The essays look to analyse the powers and the dangers of motherhood within the warp and weft of social history beginning with the premise that religious discourse or practice served as a medium in which mothers and others could assess their situation defend claims and make accusations Within this frame three main themes emerge survival agency and institutionalization The volume spans the length and breadth of the Middle Ages from late Roman North Africa through ninth century Byzantium to late medieval Somerset drawing in a range of types of historian including textual scholars literary critics students of religion and economic historians The unity of the volume arises from the very diversity of approaches within it all addressed to the central topic

From Roman Empire to Renaissance Europe Denys Hay, 2019-07-02 Originally published in 1953 From Roman Empire to Renaissance Europe looks at the broader picture of the Middle Ages drawn in terms of the men and women and the situations that they had to face The constant theme of change is revealed not by detailed narrative of elements but by commentary and examples that show how ideas and systems developed and how these affected the patterns of everyday life The book looks at how the Roman Empire of the West gave way to a decentralized society vigorous brutal and inventive for which the only unifying factor was a universal acceptance of Latin Christianity In turn Christendom began to lose its coherence during the 13th and 14th centuries and by the fifteenth century Europe had emerged as a rival term a Europe in which the landed magnates had capitulated to the omnipotent and ubiquitous prince commerce as well as land now being a source of wealth This is not a static picture of the Middle Ages with fixed characteristics but of real men and women facing genuine situations
