Fall Boots 2025 Tutorial:

Downhill ski technique, step by step Janos Koranyi, 2019-04-20 This book is especially written for all insecure skiers in the first place. If you think that you are a beginner or an intermediate skier, this book is thought to be the right choice for you. But everyone interested in understanding developing learning and teaching downhill skiing can benefit from this work. I have been working on this material since 2010 and the work is still going on. My basic point is that you should prepare yourself before you go to ski. It is too late to make your mental preparation on the slopes; this should be done at home before. You should be able to imagine for yourself what you must do in order to do it right or as good as possible. This imagination should not be just a picture. It should be like a whole movie with many of your senses involved, just like in a detailed dream. Like if you can imagine the whole ski turn with many clear details: what basic movements you have to do, how it should feel in your body, how it should look like, how it should change during the development of your turn, this will prepare your correct movements in the real life. But this must happen step by step, starting by the easiest skills and developing further when you have tried out the first steps first. For this reason, I have divided the material in 3 different levels. You will need quite a long time for this. So please be patient, take your time, work with my book, do not just read it. Understanding and explaining skiing is complicated and it takes time. My suggestion is to read carefully, take several breaks, and think carefully about the sections you find difficult to understand. If you are a beginner, start reading the book as soon as possible before you start your skiing. You can stop reading after the beginner level and go skiing on green and blue slopes. You can also find a short free book about downhill ski tech on my homepage: Reports from Commissioners Great Britain.
