Trilingual Education of Uyghur Children Wei Xiaobao,2024-04-29 Given the differences in the orthographic structure of the Uyghur Chinese and English languages this study used a mixed method approach to

systematically describe and analyze the phonological awareness of Uyghur bilingual children as English learners and its contributions to their trilingual literacy acquisition and development Focusing on the development of these learners phonological awareness in Uyghur Chinese and English this study explored the influences of Uyghur and Chinese learning on the formation of their English phonological awareness and the roles of different components of phonological awareness in their trilingual literacy development Based on the characteristics of the phonetic structure in Uyghur Chinese and English and the development of Uyghur children s phonological awareness in these languages a Chinese phonetic identification training and Uyghur Chinese English comprehensive phonetic training program including intensive phoneme category contrast training and phonics training was designed to explore whether such targeted phonetic identification training can effectively improve these children s phonological awareness in Chinese and English and thus further promote their trilingual literacy development This book will appeal to researchers and students interested in the fields of psycholinguistics language acquisition and multilingual education

Early Reading Instruction Diane McGuinness,2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000

summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom

Reading Randomised Controlled Trials Robert Savage,Amy Fox ,Anneka Dawson,Helen Gray,Clare Huxley,2025-03-03 In early 2021 22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children s literacy but a case study in which the methodology of single randomised controlled trials in education

can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education International Guide to Student Achievement John Hattie, Eric M. Anderman, 2012 The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today There are many often competing claims about how to enhance student achievement raising the questions of What works and What works best World renowned bestselling authors John Hattie and Eric M. Anderman have invited an international group of scholars to write brief empirically supported articles that examine predictors of academic achievement across a variety of topics and domains Rather than telling people what to do in their schools and classrooms this guide simply provides the first ever compendium of research that summarizes what is known about the major influences shaping students academic achievement around the world Readers can apply this knowledge base to their own school and classroom settings The 150 entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick easy reference Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries guiding readers to apply this knowledge to their own classrooms their curriculums and teaching strategies and their teacher training programs *Learning Directory*, 1970
