Olds, 2025-08-11 What does it mean to be a science ambassador? This accessible book presents invaluable insights into how professional scientists can transform their career from working at the bench to becoming a public intellectual. James L. Oberhelman, 2025-07-21 This three volume set of essays is dedicated to Alain Touwaide, known for his far reaching investigations in fields such as ancient medicine, botany, pharmacy, texts and manuscripts, the classical tradition, translation, the history of science, ethnopharmacology and plant therapies. The essays, penned by 80 international scholars and researchers and written in six languages, are grouped into three broad categories: Manuscripts, Plants and Remedies, to reflect Alain's main areas of research. Each category is broken into subgroups such as manuscripts, texts and science, botany, gardens, materia medica, pharmacy, drugs, archaeology, medical traditions and continuity of scientific knowledge in the East and West. The papers reach across many fields of scholarship, science and medicine and are necessarily and fundamentally transdisciplinary, trans-chronological and trans-geographic. These volumes are not so much a Festschrift as an approach to Alain's work through many disciplines and methods, a discussion of the current status of each field and an opening into new perspectives. *How Modern Science Came into the World* Floris Cohen, 2025-10-01 Once upon a time, The Scientific Revolution of the 17th century was an innovative concept that inspired a stimulating narrative of how modern science came into the world. Half a century later, what we now know as the master narrative serves rather as a strait jacket, so often events and contexts just fail to fit in. No attempt has been made so far to replace the master narrative. H. Floris Cohen now comes up

with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome Building forth on his earlier *The Scientific Revolution A Historiographical Inquiry* 1994 his new book takes the latest researches duly into account while connecting these in highly innovative ways It is meant throughout as a constructive effort to break up all too deeply frozen patterns of thinking about the history of science *Combo (set of 2 Books)*
