On diesel models, an injection pump meters fuel to the injectors. A built-in governor regulates flow of fuel to maintain desired engine speed, and an automatic advance properly times injections with engine speed and load. Each

diesel engine has 4-hole injectors with each precision-made injector dispensing fuel evenly into the cylinder for efficient combustion, more power, and better fuel economy. The excess fuel bleeds back to the tank.

Specifications for the models of both, the gasoline and diesel engines, are in Part IV of this manual.
