Clinician's Guide to Validity Assessment and Management in Neuropsychology, Integrating the Neurobiology of Schizophrenia, 2007-02-27 This book examines the role that dopamine plays in schizophrenia examining its role in not only the symptoms of the disease but also in its treatment It also reviews all neurotransmitters that have been implicated in schizophrenia exploring the genetic data clinical data implicating the transmitter and the preclinical data exploring how a transmitter may interact with dopamine and contribute to the dopaminergic phenotype observed in the illness This book will serve as an educational tool for instructors a guide for clinicians and be of interest to researchers It is a good reference for researchers specialized in one particular area and interested in learning about other areas of pathology in schizophrenia and how they may all feed into each other The book concludes with an overall integrative model assembling as many of these elements as possible *Cognitive deficits in schizophrenia and other neuropsychiatric disorders: Convergence of preclinical and clinical evidence* Ales Stuchlik, Tomiki Sumiyoshi, 2015-10-23 Neuropsychiatric diseases such as schizophrenia Alzheimer's disease and etc represent a serious medical and socioeconomic problems These diseases are often accompanied by impairments of cognitive function e.g. abstract thinking decision making attention and several types of memory Such deficits significantly disrupt quality of life and daily functioning of patients Cognitive deficits in neuropsychiatric diseases are associated with alterations of brain morphology and function and are often resistant to therapeutic interventions In schizophrenia and related disorders cognitive deficits are also defined as endophenotypes i.e. measurable phenotypes linking these diseases with discrete heritable and reproducible traits This points to the importance of elucidating these endophenotypes in translational studies Animal models may not mimic the full spectrum of clinical symptoms but may act as analogies of particular behaviors or other pathological outcomes They are useful to search for the etiology of particular psychiatric illnesses and novel therapeutics Moreover several behavioral tests to measure cognitive performance in rodents and other species have been implemented The primary focus of the present topic is to provide up to date information on cognitive deficits of neuropsychiatric disorders such as schizophrenia This Research Topic also delineates future directions for translational studies aimed at developing novel treatments interventions of cognitive disturbances *The Assessment and Treatment of Older Adults* Lee Hyer, 2019-10-04 Grounded in extensive research this book outlines a deliberative process

in the psychosocial care of older adults both in terms of assessment and treatment. It is a clinical undertaking with academic emphasis on the real life needs of older adults and even considers current meta trends of health. The world of aging has changed. Data now clearly suggest that older age is replete with exciting complexities that can be unpacked and changed. Specifically the book articulates a Watch and Wait model of care espousing a plan for the modal problems of later life. Five domains are presented as a sufficient understanding of a case: general health, cognition, depression, anxiety, and life adjustment. Importantly, assessment is considered first in each domain and a profile for each patient is provided as a result. The text also discusses the role of personality in later life. Empirically supported interventions are then provided in each area. This book is intended for health care professionals as well as academics who work with this population. Older age is changing and a newer model of care is necessary.

Neuroscience in Africa Nilesh B. Patel, Vivienne A. Russell, Nouria Lakhdar-Ghazal, 2019-06-28. This Research Topic covers some of the latest research on brain and behavior in health and disease in Africa. With its untapped resources and unique situations, Neuroscience in Africa has the potential to contribute to a better understanding of human brain function both in health and disease. The diverse African fauna display a range of specializations in brain structure function relationships as a result of adaptations to the environment. Exploration of these may lead to insights into coping strategies which could be extrapolated to humans. Africa's unique flora is being investigated for anti-inflammatory, antinociceptive, antioxidant, antiepileptogenic, and neuroprotective properties to determine its potential for use in the treatment of human brain disorders. There is also research on neurodegenerative and infectious diseases not only common to the global world but also neglected tropical diseases and conditions which provide unique avenues of investigations in basic and translational neuroscience on highly debilitating disorders and on the effects of pathogens and environmental toxins.
