Threshold Concepts in Practice Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 *Threshold Concepts in Practice* brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts Framework In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal Learners enter new conceptual and often affective territory Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view These conceptual gateways are integrative exposing the previously hidden interrelatedness of ideas and are irreversible However they frequently present troublesome knowledge and are often points at which students become stuck Difficulty in understanding may leave the learner in a liminal state of transition a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry Learners navigating such spaces report a sense of uncertainty ambiguity paradox anxiety even chaos The liminal space may equally be one of awe and wonderment Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods These spaces require not only conceptual but ontological and discursive shifts This volume the fourth in a tetralogy on Threshold Concepts discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine law engineering architecture and military education Cover image Detail from Eve offering the apple to Adam in the Garden of Eden and the serpent c 1520 25 Lucas Cranach the Elder 1472 1553 Bridgeman Images All rights reserved

[Threshold Concepts in the Moment](#), 2024-04-22 In the twenty years since Ray Land and Erik Meyer published their first paper on Threshold Concepts there has been a steady stream of papers mulling over their original suggestions that learning far from proceeding in an orderly fashion is instead a process of struggle perhaps alienation and confusion that puts students in a troublesome liminal in between state As their understanding develops liminality gives way to transformational insight whereby a whole field of study comes often quite abruptly into focus There is a gain but often also a loss in this new world old certainties assumptions and even aspects of our identity can be left by the wayside *Threshold Concepts in the Moment* is the sixth collection in the series on the subject of Threshold Concepts following the 8th Biennial Conference held in 2021 anchored at London's UCL but running online across the world Its contributors who range from old hands to new members of the community finding their feet mull over the insights of the threshold concepts framework in higher education scrutinise their own fields of study explore the implications of liminality for pedagogy and becoming

professional practitioners and consider the broad implications for pedagogy of factoring in the troublesomeness of knowledge and learning The Rebirth of Antisemitism in the 21st Century David Hirsh,2023-11-29 The Rebirth of Antisemitism in the 21st Century is about the rise of antizionism and antisemitism in the first two decades of the 21st century with a focus on the UK It is written by the activist intellectuals both Jewish and not who led the opposition to the campaign for an academic boycott of Israel Their experiences convinced them that the boycott movement and the antizionism upon which it was based was fuelled by and in turn fuelled antisemitism The book shows how the level of hostility towards Israel exceeded the hostility which is levelled against other states And it shows how the quality of that hostility tended to resonate with antisemitic tropes images and emotions Antizionism positioned Israel as symbolic of everything that good people oppose it made Palestinians into an abstract symbol of the oppressed and it positioned most Jews as saboteurs of social progress The book shows how antisemitism broke into mainstream politics and how it contaminated the Labour Party as it made a bid for Downing Street This book will be of interest to scholars and students researching antizionism antisemitism and the Labour Party in the UK

The Teaching of Criminal Law Kris Gledhill,Ben Livings,2016-08-19 The Teaching of Criminal Law provides the first considered discussion of the pedagogy that should inform the teaching of criminal law It originates from a survey of criminal law courses in different parts of the English speaking world which showed significant similarity across countries and over time It also showed that many aspects of substantive law are neglected This prompted the question of whether any real consideration had been given to criminal law course design This book seeks to provide a critical mass of thought on how to secure an understanding of substantive criminal law by examining the course content that best illustrates the thought process of a criminal lawyer by presenting innovative approaches for securing active learning by students and by demonstrating how criminal law can secure other worthwhile graduate attributes by introducing wider contexts This edited collection brings together contributions from academic teachers of criminal law from Australia New Zealand the United Kingdom and Ireland who have considered issues of course design and often implemented them Together they examine several innovative approaches to the teaching of criminal law that have been adopted in a number of law schools around the world both in teaching methodology and substantive content The authors offer numerous suggestions for the design of a criminal law course that will ensure students gain useful insights into criminal law and its role in society This book helps fill the gap in research into criminal law pedagogy and demonstrates that there are alternative ways of delivering this core part of the law degree As such this book will be of key interest to researchers academics and lecturers in the fields of criminal law pedagogy and teaching methods **Threshold Concepts Within the Disciplines** Ray Land,Jan Meyer,Jan Smith,2008 Threshold Concepts within the Disciplines brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to

arrive at important new understandings In crossing the portal transformation occurs both in knowledge and subjectivity Such transformation involves troublesome knowledge a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities its links to other social theories of learning and other traditions in educational research Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing engineering biology design modern languages education and economics In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts Other chapters emphasise the equally important being and becoming dimension of learning Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers The book will be of interest to disciplinary teachers educational researchers and educational developers It also is of relevance to issues in quality assurance and professional accreditation

Threshold Concepts and Transformational Learning ,2010-01-01 Over the last decade the notion of threshold concepts has proved influential around the world as a powerful means of exploring and discussing the key points of transformation that students experience in their higher education courses and the troublesome knowledge that these often present Threshold concepts provoke in the learner a state of liminality in which transformation takes place requiring the integration of new understanding and the letting go of previous learning stances Insights gained by learners as they cross thresholds can be exhilarating but might also be unsettling requiring an uncomfortable shift in identity or paradoxically a sense of loss The liminal space can be a suspended state of partial understanding or stuck place in which understanding approximates to a kind of mimicry Threshold Concepts and Transformational Learning substantially increases the empirical evidence for threshold concepts across a large number of disciplinary contexts and from the higher education sectors of many countries This new volume develops further theoretical perspectives and provides fresh pedagogical directions It will be of interest to teachers practitioners and managers in all disciplines as well as to educational researchers

Journal of Technology Education ,2010 **Australasian Journal of American Studies** ,2006 *Education that Matters* Mags Liddy,Marie Parker-Jenkins,2013 Today s learners are faced with an unprecedented set of global and local development challenges yet so much education on offer is based on yesterday s thinkers ideas and lessons This book argues that development education should be embedded into the curriculum where it has the potential to strengthen democracy and create a more equal society

Boundless Horizons Barbara Watson, Billie J. Askew, 2009 BOUNDLESS HORIZONS tells the extraordinary story of Marie Clay's lifelong search for new possibilities in teaching young children to read and write She pursued a tantalising quest What is possible for children with reading problems What would have to change Observing young readers in ordinary classrooms she uncovered explanations of how children take on literacy learning and how that learning changes over time From those discoveries arose the internationally successful literacy intervention for children having temporary difficulty Reading Recovery This book is written for all professionals who are seeking better possibilities for children struggling to read and write A major theme is the enduring commitment to the child becoming an independent reader and writer but Marie Clay also extended her inquiries to teachers She demonstrated ways in which research theory and practice can interact And because her research was rooted in the real world teachers and teacher educators will find in it new possibilities to widen the horizons of their work Marie Clay's evidence based research was convincing Reading Recovery worked in New Zealand schools Later experience showed it working with different children in different schools in several different countries Contributors to this book trace the progress of Reading Recovery's expansion looking closely at international research which has studied the outcomes for more than a generation of children helped by Reading Recovery teaching Reprints of her early research on Reading Recovery and chapters highlighting her methodology together with subsequent international research and evaluation provide a gold standard for a new generation of researchers administrators and policy makers And the story of Marie Clay's unique search for possibilities to replicate Reading Recovery implementation across international settings and cultural contexts offers a framework for educational change agents Readers of BOUNDLESS HORIZONS will gain an understanding of the concepts and principles underlying Reading Recovery and an insight into why this originally small local project has taken wing to far places in undreamed of ways Marie Clay has left a challenging legacy to continue that search for possibilities keeping to her strict standards of research practice and international dissemination Her work will guide

dedicated professionals who will continue to be surprised and delighted by what is possible as the horizons ever extend
